WINTER 1959—VOL. 2, NO. 2

PRESBYTERIAN-ST. LUKE'S

REVIEW

Published quarterly for friends of Presbyterian-St. Luke's Hospital, Chicago. Editorial Office: Presbyterian-St. Luke's Hospital Development Office, 208 S. LaSalle St., Chicago 4, Illinois. Telephone: FRanklin 2-0380.

Three of the eight Occupational Therapists pictured in the 13th floor occupational therapy area of the new Psychiatric Unit. A similar area is available to patients on the 12th floor.

THE COVER

Only a few of the many professional items provided by the hospital's Central Service Unit. (See page 4 for article and pictures.)

PHYSICAL MERGER BEGINS

On February 28th, the Departments of Neuropsychiatry of Presbyterian and St. Luke's Hospitals became one as the psychiatric unit on the 12th and 13th floors of the new East Pavilion was opened.

This is the first medical department of the combined hospitals to physically merge and the move was accomplished with smoothness and efficiency. On February 9th, a period of orientation of personnel to the new unit was begun. Also, on February 9th, admissions to St. Luke's psychiatric unit were closed with the exception of emergencies. Occupational therapy equipment was transferred by truck from St. Luke's to the new hospital on February 15th, 16th and 17th. Patients were transferred from the old Presbyterian unit on February 25th and from the St. Luke's unit on February 28th.

The new unit is designed to have as informal and homelike an atmosphere as it is possible to achieve in a hospital setting. This is accomplished through the careful choice of furniture and accessories considerably different than in the usual hospital room. The wards have been designed to take care of any kind of an emotional disorder from the most severe to the very mild.

Of the two floors, one is entirely open (13), with the patient free to come and go as with any general hospital admission. The other floor (12) is operated as a closed unit. In this the facilities are such that patients can have a varying degree of freedom depending upon their ability.

The patient has free time outside of that spent in interviews with his doctor or in special treatment situations. This time is used effectively in supervised occupational therapy, and this psychiatric unit is unique in the large amount of space which has been allocated for this purpose.

The occupational therapy area is flexible enough to be used also as the patients' dining room in which

they will eat at small tables in a group setting. The unit, in addition to adequate staffing of personnel, has modern appliances and materials for the use of the patient in both occupational and motivational ways, ranging from woodworking through music therapy. Provision also has been made for the development of therapeutic use of psychodrama with participation by the patients or for use of the same facilities for the presentation of outside talent as part of the occupational therapy program.

Also it is planned to physically merge the departments of pediatrics and obstetrics, as soon as renovation of space for these departments in the older buildings at the Presbyterian site is completed.

After careful review and study of suggestions and recommendations of the medical staffs of Presbyterian and St. Luke's Hospitals in regard to the feasibility of the earliest possible physical merger, the Board of Trustees has advanced the date of physical merger of the hospitals to no later than July 1, 1959. It was determined that this terminal date would be to the advantage of the patients of the hospital, the medical staffs, the medical education program and the administration. Further, notwithstanding the extreme pressures that such a schedule would develop for all concerned, these hardships could be borne in light of the advantages to be gained.

The medical and surgical services, the last to be consolidated, will continue to operate at St. Luke's at full capacity until a few weeks prior to the ultimate physical merger, as such date is finally determined, when admissions to these units will be closed.

To provide for the required nursing personnel on this early date of physical merger, the hospital has contracted with the YMCA to rent one hundred and fifty rooms in their building at Monroe Street and Ashland Avenue. This building will be used for nurse interns and other professional personnel.

DEPARTMENT CHAIRMEN

The medical staff organization planning has been proceeding concurrently with the building program, and the realignment of the administrative organization. The new medical staff bylaws are in effect and the selection of fifteen departmental chairmen, shown here, has been accomplished. Upon these men rests an important share of the responsibility for the immediate and future development of the hospital as a significant teaching, research and service institution.

CLEAN-UP AREA

All used professional items of equipment and supply from nursing units and other hospital areas are received and washed in this room. Orderly is operating mechanical dishwasher primarily used for utensils. Other items are washed by hand prior to being sent on to "Clean Work Area."

CENTRAL SERVICE

—A Unit of the Nursing Service Department designed to provide the hospital with the professional supplies and equipment required for direct and indirect patient care.

Not too many years ago a hospital's professional supplies and equipment, such as dressings, needles, syringes, rubber gloves, steam inhalators, distilled water and solutions, required for patient care, were prepared and maintained on the individual nursing units.

In recent years, however, a new concept in the method of preparation and maintenance of professional supplies and equipment has been developed—the method of centralization. Thus, Central Service provides a central processing and dispensing area for these sterile and non-sterile items.

Through the establishment of such a Unit, professional items have been standardized, personnel on the nursing units have been relieved of the time-consuming task of care and preparation of these items, and great economies have resulted from centralized preparation and centralized use of personnel.

IN MEMORY OF
JAMES KIDSTON
FRANCES JANE KIDSTON

Funds to build this Central Service Unit were provided by Mr. William H. Kidston in memory of his father and mother, James and Frances Jane Kidston.

CLEAN WORK AREA

Part of large area for assembling and packaging of items to be sterilized in autoclaves.

Three special rooms: Picture to left shows "Needle and Syringe Room," left, where syringes are mechanically washed, needles mechanically cleaned, and where both are packaged; and "Solution Room," right, where water is distilled and solutions are prepared. Picture above shows "Glove Room" where rubber gloves are powdered and packaged. Aide, left, is operating glove powdering machine.

Presbyterian-St. Luke's Central Service Unit is located on the ground floor of the new 13-story East Pavilion Building. In addition to supplying the nursing units throughout the Hospital, Central Service also provides certain items for the Emergency and Examining Rooms, the Outpatient Department, Employee and Student Nurse Health Services, X-ray Department, Operating Rooms, Birth Rooms, and Laboratories. Over 250 different items, many of which vary in size, are now being processed in Central Service, and, as the number of items required to process is becoming increasingly greater, additional items, formerly prepared and maintained in other hospital areas, are constantly being added.

The physical layout of the Unit is divided into three areas: the "Clean-Up Area," where used items are received, disassembled, if necessary, and washed; the "Clean Work Area," which includes a large area for assembling and packaging and three special rooms—a

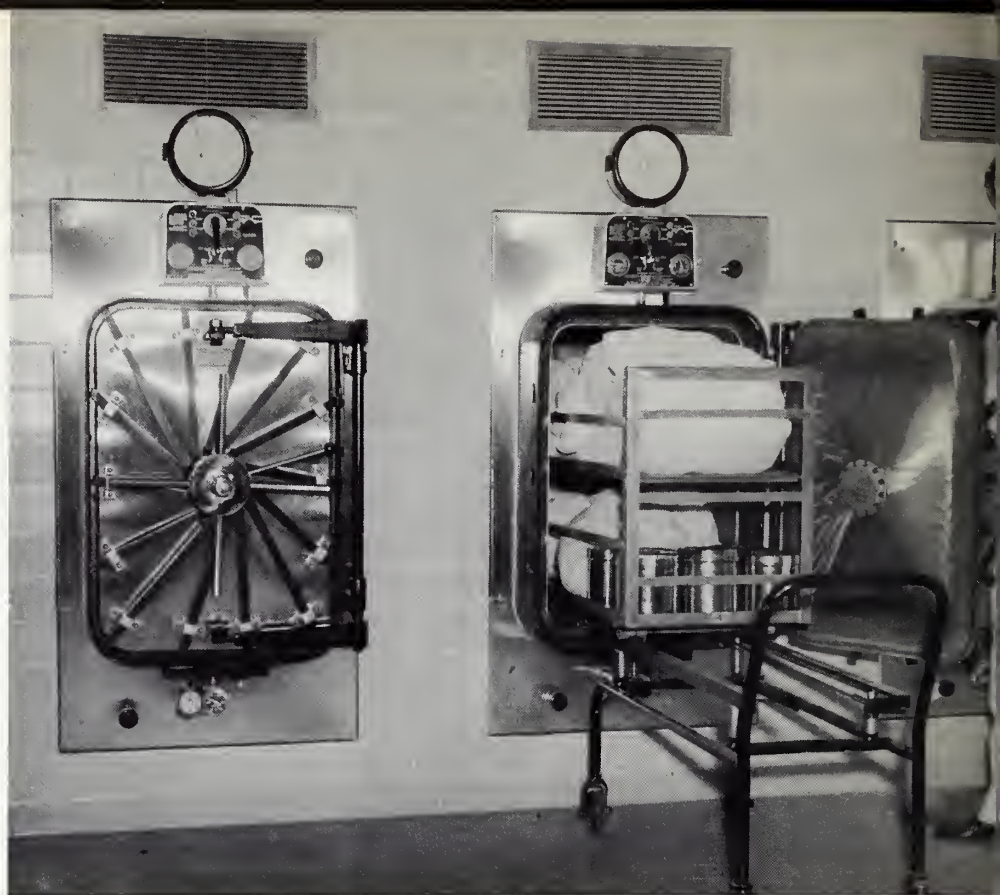

"Glove Room," a "Solution Room," and a "Needle and Syringe Room"; and finally the "Sterile Area," which houses four autoclaves for sterilization and storage shelves. Approximately 80% of the total items processed in the Unit require sterilization. Storage space occupies about 25% of the Unit's physical capacity and the other 75% is used for processing.

All of the items processed in Central Service are divided into two categories: stock items and special items. The supply of stock items has been predetermined for each nursing unit and includes rubber gloves, needles and syringes, cotton balls, basins, dressings, and so on. Aides and orderlies deliver these stock items to the nursing units three times daily to assure a full supply on each unit at all times. This eliminates the need for the nursing unit to order stock items, thus saving time for the nursing staff. Special items, many of which are very expensive, must be ordered individually by telephone, and are delivered

STERILE AREA

One aisle of storage space for stock items awaiting delivery and special items awaiting individual order.

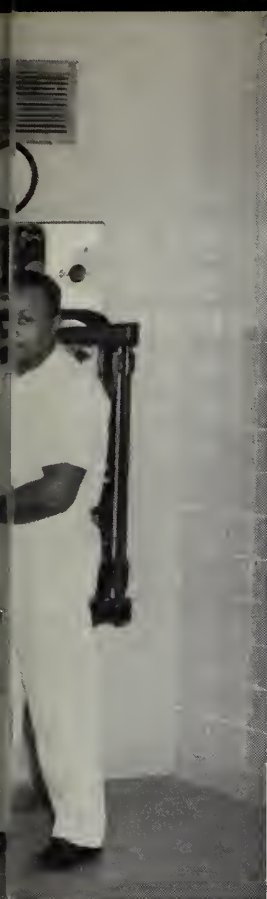

Three of four autoclaves, automatically controlled from door closing to opening, used for sterilization of 80% of items processed in Central Service.

upon request, picked up by a messenger, or sent up on the dumbwaiter to nursing units now functioning in the East Pavilion Building. These special items include certain catheters and tubings, specially prepared dressings, steam inhalators, suction apparatus, and treatment trays. Sterile treatment trays—trays set up for a specific procedure, such as a spinal puncture, to be carried out by the physician—are one of Central Service's more vital items of supply. Each of these trays includes a variety of items which must be assembled in a specific way.

In addition to the economies and efficiencies in operation resulting from centralized preparation and maintenance of professional supplies and equipment, new time- and labor-saving devices and procedures have been put into use. Wherever possible, for example, supplies to be sterilized are packaged in paper. This method saves many hours of labor for the Hospital Laundry. Formerly, all supplies to be sterilized

were wrapped in double-thickness muslin necessitating a large volume of washing to be handled in the Laundry. In turn, the Laundry now saves a great deal of time and labor for Central Service personnel by washing and drying all soiled rubber gloves prior to their being powdered and packaged in the "Glove Room." Labor-saving devices in the Unit include: a mechanical dishwasher in the "Clean-Up Area" for utensils, such as trays, basins, irrigating cans, graduates; the latest in automatically controlled autoclaves; a machine for washing syringes; a needle cleaning machine; and a glove conditioner for powdering rubber gloves.

Operated on a twenty-four hour basis by a supervisor and aides and orderlies, who have received special on-the-job technical training, the Central Service Unit assures the Hospital of immediate accessibility to the professional supplies and equipment so vital to the care of the patient.

Orderly removing stock items for delivery he will make to nursing units.

DELIVERY AND PICK-UP

Nursing Unit Clerk comes down to pick up special item requested by her unit.

Dumbwaiter conveys special order to nursing unit in new East Pavilion Building.

CONSTRUCTION AND RENOVATION

The Robert R. McCormick 56-room addition to the School of Nursing.

The foundation work for the Medical Science Research Building was awarded to the George Sollitt Construction Company and work has been under way since November 24, 1958. Bids for the erection of the superstructure will be requested for late April and completion of the building is tentatively scheduled for the second quarter of 1960.

Major remodeling work in the old sections of the hospital is now under way. This consists of rehabilitation of surgical areas on the sixth floor providing four new major operating suites, three new specialty operating areas, and other facilities related thereto. Extensive rehabilitation of the pediatric areas on the fifth floor has been started, as well as seventh floor remodeling to expand and remodel areas for obstetrics. The expanded provisions for these departments will make possible the physical merger of the St. Luke's departments by approximately May 1.

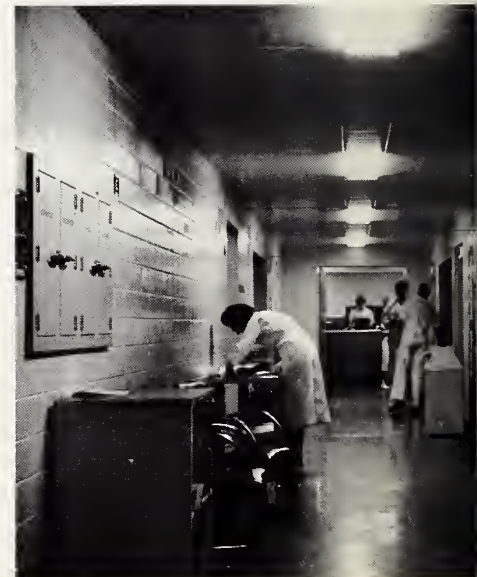

The Robert R. McCormick Addition to the School of Nursing is on schedule and only the interior work remains to be completed. This building, providing 56 additional rooms for the school, will be finished on approximately April 15th.

The rehabilitation and remodeling of many other minor areas are under way in the old sections of the hospital and space will be at a premium until the Medical Science Research Building is completed in early 1960.

Foundation work under way on the Medical Science Research Building.

A portion of the new X-ray department now in operation on the first and ground floors of the East Pavilion.

Major remodeling begins on 5th floor pediatrics area.

6th floor renovation under way to provide additional operating room facilities.

New cafeteria nearing completion.

YEAR-END GIVING

The focus of year-end giving was directed toward the need for general operating funds. Gifts for this purpose totalled approximately \$110,000. In addition, payments have been received on pledges to the building fund in the amount of \$200,000 and new gifts to the building fund totalled \$170,000. Funds for special purposes amounted to approximately \$110,000. This is a total of \$590,000. Over one-half of this money is for the building program.

It is evident that the hospital has the potential to expand and build its annual giving to provide unrestricted funds of \$500,000 each year. To accomplish this, a great increase in giving units for modest, as well as substantial and continuing amounts must be found.

HAROLD J. NUTTING

TRUSTEE ELECTIONS

At the 1958 annual meeting of the Board of Trustees last November 5th, Mr. Ralph A. Bard resigned as Chairman of the Board and was presented with a framed testimonial from the Board of Trustees for his years of valuable service to the hospital and particularly for his leadership in the aggressive planning and executing of the development program.

His responsibilities as Chairman of the Board have been assumed by Harold J. Nutting, who has been a member of the Board for six years. Mr. John P. Bent retains his position as President of the Board and its chief executive officer. The other officers elected to serve until the annual meeting in 1959 are as follows:

HERBERT P. SEDWICK,
Executive Vice President

PHILIP R. CLARKE, Vice President
WILLIAM F. BORLAND, Vice President
E. HALL TAYLOR, Vice President
WILLIAM M. COLLINS, JR.,
Vice President

GEORGE B. YOUNG, Secretary
FREDERICK S. BOOTH,
Assistant Secretary
SOLOMON A. SMITH, Treasurer
GORDON AREY, Assistant Treasurer

At the December meeting of the Board of Trustees, the following committees of the Board were approved:

EXECUTIVE COMMITTEE

HAROLD J. NUTTING, Chairman
JOHN P. BENT
HERBERT P. SEDWICK
PHILIP R. CLARKE
SOLOMON A. SMITH
WILLIAM M. COLLINS, JR.
E. HALL TAYLOR
GEORGE B. YOUNG
JOHN M. SIMPSON
ALBERT D. FARWELL
A. WATSON ARMOUR, III
EDWARD D. McDOUGAL, JR.
THE RT. REV. GERALD FRANCIS BURRILL

NOMINATING COMMITTEE

JOHN M. SIMPSON, Chairman
ANTHONY L. MICHEL, Vice Chairman
ROBERT C. BORWELL
BROOKS McCORMICK

MEDICAL STAFF ACTIVITIES

"What's New in Obstetrics" was Dr. John S. Long's paper presented before the LaPorte County Medical Society in December. In October, Dr. James H. Mitchell addressed this Society at its annual dinner meeting. His subject: "Contact Dermatitis and Toxic Dermatoses."

Dr. Frederic C. Moll was in Vancouver, B.C. in November to give the Presidential Address before the Western Society for Pediatric Research. He served as President of this Society during 1958.

In December, Dr. Paul E. Nielson spoke before the Illinois Hospital Association in Springfield on "Adapting Our Services to Changing Needs, The Mentally Ill."

"Staphylococcal Infections in Hospitals" was Dr. Harry Dowling's talk presented before the Toledo Academy of Medicine in February.

Dr. Stanton A. Friedberg presented a paper before the Detroit Otolaryngological Society in November. His subject: "Esophagitis."

Dr. Howard Wakefield attended the American College of Physicians regional meetings in Santa Fe, Los Alamos and Fargo in the fall where he presented a paper on "Experimental Distention of Human Gall Bladder."

At the January meeting of the Milwaukee County Medical Society, Dr. John R. Wolff participated on a panel on "Perinatal Mortality."

To promote and further improve the quality of medical care and instruction in Army installations, Dr. Edwin N. Irons took a five week tour of 26 U. S. Army Hospitals in Europe as Consultant in Medicine to the Surgeon General of the Army.

"Physics and the Future of Medicine" was the subject of Dr. Robert M. Kark's lecture before the Armour Research Foundation in Chicago in November.

Dr. Eugene F. Traut presented a paper before the Chicago Rheumatism Society in October entitled "Placebos in the Evaluation of Therapy of Rheumatic Diseases."

Dr. Francis J. Gerty was in Washington, D.C. in November to attend a special meeting called by Arthur S. Flemming, Secretary to the Department of Health, Education and Welfare. The Secretary called this meeting to talk with leaders in the field of health and welfare. Dr. Gerty was invited in his capacity as President of the American Psychiatric Association.

Drs. Robert A. Beebe, Alfred D. Biggs and Maurice M. Albala recently attended the 3rd Illinois Congress on Maternal and Infant Care in Springfield. Dr. Beebe was Chairman of the Program Committee; Dr. Biggs moderated a problem clinic—"Emergencies of the Newborn;" and Dr. Albala lectured on "Anemias of Pregnancy."

ELECTIONS TO OFFICES

Dr. Warren H. Cole, President-Elect, American Cancer Society.

Dr. Benjamin M. Gasul, Board of Governors, Chicago Heart Association.

Dr. R. K. Gilchrist, Treasurer, American College of Surgeons.

Dr. Douglas MacFadyen, re-elected Trustee, American Board of Pathology.

MEDICAL COMMITTEE

E. HALL TAYLOR, Co-Chairman
GEORGE B. YOUNG, Co-Chairman
ALBERT B. DICK, III
WILLIAM F. BORLAND
ANTHONY L. MICHEL

Dr. Paul E. Nielson, Secretary-Treasurer, Illinois Psychiatric Society.

Dr. Francis J. Gerty, President, Board of Directors, American Board of Psychiatry and Neurology.

Dr. Paul H. Holinger, President, Pan American Society of Otolaryngology and Bronchoesophagology.

Dr. Paul W. Searles, Chairman, Board of Governors, American College of Anesthesiologists.

Dr. E. Lee Strohl, re-elected to Board of Governors and Treasurer, Institute of Medicine of Chicago.

Dr. John R. Wolff, Board of Directors, Mississippi Valley Medical Society.

Dr. Walter H. Theobald, re-elected to thirteenth term as President of Chicago's Medical Center Commission.

Dr. Robert D. Ray, President, Orthopaedic Research Society.

Dr. Frederick C. Bauer, Secretary, Chicago Pathological Society.

Dr. Frank E. Trobaugh, Jr. has been appointed 1959 Chairman of Technical Exhibits, American Association of Blood Banks.

In December, Dr. Trobaugh presented a paper, "Refractory Anemia," before the Chicago Society of Internal Medicine.

In mid-February, Drs. George W. Stuppy, Evan M. Barton and Charles V. Heck were among those staff members participating in the First Chicago Post Graduate Course in Arthritis and Related Conditions held at Northwestern University. Dr. Stuppy lectured on "Generalized Osteoarthritis;" Dr. Heck on "Arthritis of the Spine;" and Dr. Barton on "Ankylosing Spondylitis."

During the month of October, Dr. Lester A. Nalefski gave lectures on "Chronic Renal Failure" in Ottawa, Elgin, Oak Park

and Mount Carmel as a Faculty Member of the Illinois Academy of General Practice's Post Graduate Program.

Dr. William F. Hughes served as Co-Chairman of the Symposium on "Radiotherapy of the Eye" at the American Academy of Ophthalmology and Otolaryngology meeting in Chicago in October.

"All Epilepsy is One" was Dr. Roland P. Mackay's Presidential Address before the American Epilepsy Society meeting in New York in December.

Drs. Mackay and Donald D. Layton recently have been presenting talks on Multiple Sclerosis to lay audiences in Chicago and Suburbs.

The Cardiovascular Section of Mount Sinai Hospital in Miami Beach recently heard Dr. Benjamin M. Gasul speak on "Diagnosis of Corrected Transposition of the Great Vessels of the Heart."

Dr. Noel G. Shaw participated on the program of the Chicago Pediatric Society's recent Clinical Meeting. He is President of this Society.

In December, Dr. Paul W. Searles attended the Chautauqua Medical Society meeting in Dunkirk, N.Y. where he presented a paper on "Pitfalls and Errors in Surgical Anesthesia."

Dr. Paul H. Holinger has been named the Samuel Crowe Visiting Professor in Otolaryngology for 1959 at Johns Hopkins.

In October, Dr. Holinger spoke before the Mississippi Valley Conference on Tuberculosis in Dayton, Ohio. His subject: "Bronchoscopy in the Diagnosis of Intrathoracic Disease."

A paper and film, "Respiratory Obstruction in Infants and Children," were presented by Dr. Kenneth C. Johnston at the

Manitoba Medical Association's 50th Anniversary meeting in Winnipeg.

"Interesting Fracture Problems" was Dr. Kenneth L. Matson's paper presented before the McLean County Medical Society in Bloomington, Ill. in December.

In New York in October, Dr. Ladislav J. Meduna presented two papers before the Eastern Psychiatric Association, one of which was entitled "History and Rationale of the Convulsive Treatment."

COLEMAN MEDAL TO DR. COLEMAN

At the 1957 annual meeting of the Institute of Medicine of Chicago, an annual prize, known as the George Howell Coleman Medal to be given for "outstanding service in medicine and allied sciences in Chicago," was established to honor Dr. Coleman for his meritorious service to all things worthwhile in medicine in Chicago.

On October 27, 1958, the first George Howell Coleman Medal was awarded to Dr. Coleman for his "outstanding service to the community above and beyond the practice of his profession" at a dinner in the Drake Hotel attended by more than 300 of his friends and colleagues.

"Juvenile Amputees" was Dr. Claude N. Lambert's paper presented before the Oklahoma State Orthopaedic Society in October.

At the October meeting of the Central Society for Clinical Research at the Drake, Dr. Richard H. Andresen presented a paper on "Elimination of Inflammation to Homografts by Transfusions of Donors' Blood Cells," co-authored by Dr. Clarence W. Monroe.

Dr. Monroe was in charge of the Scientific Program for the American Society of Plastic and Reconstructive Surgery's meeting in October at the Drake. Dr. John W. Curtin was local arrangements chairman for this meeting.

As Chairman of the Ad Hoc Committee of Cancer Control of the National Cancer Institute, Dr. Danley P. Slaughter recently made site visits to various schools in North and South Dakota, and Iowa.

At the American College of Chest Physicians meeting at the Palmer House in November, Dr. Robert J. Jensik presented a paper entitled "The Adjuvant Chemotherapy Program in Lung Cancer." At the recent meeting of this College in Rochester, Minnesota, Dr. Robert W. Carton conducted a fireside conference.

"It's the Community's Business" was the subject of Dr. Edward C. Holmblad's Keynote Address at the recent Regional Meeting of the President's Committee on Employment of the Physically Handicapped in Indianapolis.

DR. GRULEE HONORED

The North Suburban Branch of the Chicago Medical Society recently honored Dr. Clifford G. Grulee for "his contribution to Pediatrics the world over."

A plaque, to become part of the Branch's archives, was presented to Dr. Grulee and includes pictures of him and the Evanston Headquarters of the American Academy of Pediatrics, which he helped found in 1929 and of which he is now Honorary President.

Drs. James H. McDonald and James A. Calams were awarded "first prize for scientific contributions" for their paper, "Extraparenchymal Leydig-like Cells; Observations Following Subcapsular Orchiectomy," at the October meeting of the North

Central Section, American Urological Association in Milwaukee.

At this meeting, Drs. James W. Merricks' and Frank B. Papierniak's motion picture, "Vaginal Repair of Urethro Vaginal Fistula," was shown. This motion picture was awarded a citation by the American College of Surgeons, and Dr. R. K. Gilchrist also received an award from the College for presentation of his film, "Diverticulitis."

In February, before the Henry Ford Medical Society in Detroit, Dr. Gilchrist spoke on "The Cancer Patient is Entitled to have an Optimistic Surgeon."

Drs. Warren H. Cole and James A. Campbell participated on the program of the Southern Medical Association's 52nd annual meeting in New Orleans in November. Dr. Cole's subject was "Dissemination of Cancer Cells;" and Dr. Campbell gave the Essayist Address: "High Blood Pressure vs. Hypertensive Heart Disease."

Dr. Frank V. Theis presented Post Graduate Lectures in Surgery, "Problem of the Ischemic Limb," and in Medicine, "Thrombosis and Thromboembolism," in October and November, respectively, before the Chicago Medical Society.

In November, Drs. Harry W. Southwick and John H. Olwin attended the Western Surgical Association meeting in Rochester, Minnesota, where Dr. Southwick presented a paper on "Malignant Disease of the Head and Neck in Children," and Dr. Olwin participated on a Panel on Blood Coagulation. His subject: "Prediction of a Tendency to Thrombosis."

Dr. Burton C. Kilbourne was Chairman of the Clinical Meeting of the Chicago Surgical Society held at St. Luke's on February 6; and Dr. Edwin M. Miller served as Moderator when the Chicago Committee on Trauma of the American College of Surgeons met at Presbyterian on February 10.

In early January, Dr. Vernon L. Guynn presented a report of two cases of "Massive G.I. Hemorrhage from Liver" before the Chicago Surgical Society.

Dr. C. Bruce Taylor presented papers before the Chicago Pathological Society's October, December and January meetings, one of which was entitled "Experimental Aneurysms of the Aorta in Dogs," with Drs. S. G. Economou, Edward J. Beattie, Jr. and Beverly Tews. In February, Dr. Beattie was in Anchorage, Alaska to participate in round-table discussions on "Abdominal Emergencies" at a Post Graduate Seminar sponsored by the Anchorage Medical Society and Lederle Laboratories.

Dr. Oscar Sugar went to Oklahoma City in February to present papers on "Headaches of Cervical Origin" and "Subarachnoid Hemorrhage" before the annual meeting of the Oklahoma Chapter, American Academy of General Practice.

"A Critical Review of the Problems of the Diagnosis of Malignancy in Private Patients" was Dr. William F. Mengert's topic presented at the October meeting of the Central Association of Obstetricians and Gynecologists in Minneapolis.

In February, Dr. Hugo C. Baum spoke on "Pediatric Gynecology" before the Steubenville, Ohio, Academy of Medicine.

Drs. Milton Weinberg, Jr. and Hushang Javid have recently been Certified by the American Board of Thoracic Surgery.

Drs. Frederic A. dePeyster and Carl B. Davis, Jr. served on the Local Committee on Arrangements for the American College of Surgeons' October meeting.

HOSPITAL COUNCIL PARTICIPATION

The Chicago Hospital Council held its annual meeting in January at the Congress Hotel.

A special feature of this annual meeting was a student nurse uniform fashion show entitled "Nightingalia," produced and narrated by Florence K. Lockerby, Chairman, Department of Communication, Presbyterian-St. Luke's School of Nursing. Sixty-one student nurses, representing thirty-seven of the Chicago area's thirty-eight schools of nursing, modelled period uniforms, covering each decade from 1880 to 1930 (see cut), and contemporary uniforms. Period music accompanied the models and the running commentary included specifics about and allusions to the history of Chicago and its hospitals.

Another feature of this luncheon meeting was the annual presentation of Awards of Merit, including the "Employee of the Year" Award. Three finalists, chosen from candidates submitted by hospitals throughout the Chicago area, were selected in this category, and, although not the grand prize winner, Mrs. Helen Losand, Chief Telephone Operator of the Presbyterian division, was one of the three finalists. Mrs. Losand has been associated with Presbyterian since 1917 and has served in her present position since 1922.

HONORED FOR SERVICE

Twenty-three employees of the Presbyterian division recently were honored for their years of service to the hospital.

Mr. John P. Bent, President, Presbyterian-St. Luke's Board of Trustees, presented \$25 U.S. Savings Bonds to nineteen employees for ten years of service, and to two employees for twenty-five years of service—Mrs. Dorothy Kallay, R.N. and Mrs. Anna Holan, Housekeeping. In addition, Mr. Bent paid special tribute to Edna McCullough, R.N. and Theodore Primis, Information Clerk, for their forty years of outstanding service to the hospital. They each received \$50 U.S. Savings Bonds.

ELECT NEW OFFICERS

Mrs. Fentress Ott has been elected President of St. Luke's Woman's Board, succeeding Mrs. Charles H. Morse, Jr., who had served as President for three years. Mrs. Ott has been associated with the St. Luke's Board since 1952.

Other officers elected at the Board's annual meeting in January are: Mrs. Charles H. Morse, Jr., 1st Vice President; Mrs. Paul H. Holinger, 2nd Vice President; Mrs. Robert McCormick Adams, 3rd Vice President; Mrs. John V. Farwell, Treasurer; Mrs. Carl A. Hedblom, Jr., Assistant Treasurer; Mrs. Robert T. Isham, Recording Secretary; Mrs. Brooks McCormick, Assistant Recording Secretary; Mrs. Bowen Blair, Corresponding Secretary; and Mrs. Herbert C. DeYoung, Fashion Show Chairman.

The Presbyterian Woman's Board held its annual meeting in October at which time two new officers were elected: Mrs. Anthony L. Michel, Vice President, and Mrs. John Fred Vickrey, Treasurer. Mrs. Charles Balfanz, President, and other officers are continuing their unexpired terms.

THEIR HEARTS BELONG TO DADDY

Some 130 fathers of freshman nursing students participated in "Father's Day" at the School of Nursing on Saturday, February 21. With their daughters, the dads attended classes in Science, Social Science, Communication, and Nursing. At noon, they were guests at luncheon served in the Nurses' Residence and attended by faculty, hospital administration, and representatives of the Board of Trustees, Medical Staff, and Woman's Board. In the afternoon, a tour of the East Pavilion acquainted the fathers with the new clinical facilities and progress of the merged institution. Their day concluded with coffee at the residence, choral music by the freshmen, and open house in the dormitory.

The theme of the day, "My Heart Belongs to Daddy," was featured in a newspaper published by the daughters for the occasion. Dad's Day originated at the St. Luke's division in 1954 to acquaint the man who pays the bills with the academic, professional, and social dividends his investment yields for his daughter.

ST. LUKE'S INTERN HONORED

Three of America's ten outstanding young men

of 1958, honored by the U.S. Junior Chamber of Commerce, are physicians. One of these physicians is Dr. James T. Grace, Jr., 35, who interned at St. Luke's in 1948-49 and served as Assistant Resident in Surgery in 1949-50. Dr. Grace, a graduate of Harvard Medical School, was cited by the Jaycees for his research on cancer at Roswell Park Memorial Institute in Buffalo, New York.

MR. GREER RESIGNS

Joseph P. Greer, an Assistant Director of Presbyterian-St. Luke's and Administrator of the St. Luke's division, has resigned to become Director of Children's Medical Center in Boston, effective in April.

Mr. Greer came to St. Luke's in 1955 as Associate Director and assumed the responsibilities of Director upon the retirement of Leo M. Lyons. A graduate of the University of Chicago School of Hospital Administration, he was Assistant Administrator of the University of North Carolina Hospital in Chapel Hill prior to coming to St. Luke's. With the merger of Presbyterian and St. Luke's in April, 1956, Mr. Greer was appointed an Assistant Director of the combined hospital.

James J. Herman, who has been serving as Mr. Greer's assistant, has been appointed Acting Administrator of the St. Luke's division. Calvin C. Singer, Mr. Greer's other assistant, will undertake the planning and the execution of the physical merger of the two outpatient departments.

NURSING COUNCIL FORMED

Under the Chairmanship of Mrs. Frank P. Hixon, the Presbyterian-St. Luke's Nursing Council was formed this past fall.

The purpose of the Council is to assist the school administration, by working with many school activities, and to work closely with the Nursing Committee of the Board of Trustees. The Chairman and Vice-Chairman of the Council will attend meetings of the Trustees' Nursing Committee.

Membership on the Council includes representatives from the following: Presbyterian and St. Luke's Woman's Boards; Presbyterian and St. Luke's Alumnae Associations; Board of Trustees' Nursing Committee; and Nursing and Hospital Administration.

Finale of uniform fashion show—"Nightingalia"—at Chicago Hospital Council's annual meeting. Only three-quarters of the group are shown here as models in period uniforms have joined their contemporary counterparts on stage. Note Presbyterian-St. Luke's to right of center: Presbyterian's uniform of 1903, left, and St. Luke's—1884; and in left background, Presbyterian-St. Luke's—1956.

Royal Visit. Princess Sophia of Greece and her Lady-in-Waiting chat with Norman A. Brady, Associate Director, in the lounge of the new East Pavilion. The Princess had come to the hospital to see the Greek Consul's wife, who was hospitalized at the time of the Royal Party's visit to Chicago.

RELIGION

... an essential part

of the hospital's function ...

In establishing the Department of Religious Ministry of Presbyterian-St. Luke's Hospital, the Clerical Board of the Board of Trustees—Dr. Harold L. Bowman, Dr. Herbert N. Brockway, The Rt. Rev. Gerald Francis Burrill, The Rev. Sherman S. Newton, The Rt. Rev. Charles L. Street, and Dr. Clarence N. Wright—wrote the following statement of aims for inclusion in the hospital By-Laws:

“Religion plays a vital role in the healing and rehabilitation of man. Spiritual needs are acute in the unique, complex situation of the hospital community where sickness and suffering are concentrated. An adequately trained, wise and understanding chaplain is required if the role of religion is to be fulfilled and effective.

“Since Presbyterian-St. Luke's Hospital in its name and in its dual heritage represents the benevolent concern of the United Presbyterian Church in the U.S.A. and the Protestant Episcopal Church in the U.S.A., it is fitting that there should be two chaplains, one from each of these Churches, to serve the patients and the staff of the enlarged hospital.

“To be eligible to serve as a chaplain in Presbyterian-St. Luke's Hospital, one must be a clergyman in good and regular standing in his Church and be accredited by one of the recognized accrediting agencies.

“The chaplains shall be appointed by the Board of Directors of the hospital on recommendation of the Clerical Board. The salaries of the chaplains and their operating budget shall be determined by the Board of Directors on recommendation by the Clerical Board and by the Director of the hospital.

“The chaplains shall serve full time, being in attendance during working hours and responsible for duty as emergency may require. They shall not engage in other remunerative work.

“The chaplains shall be responsible to the Clerical Board. They shall make regular reports to and have access to the Clerical Board.

“Following their appointment the chaplains shall be formally installed in a manner appropriate to their Church orders and to the hospital situation.

“The chaplains shall lead or arrange for the leading of all worship services in the hospital. They must supervise visits by religious groups and carefully screen all religious “workers” other than pastors calling on their own members.

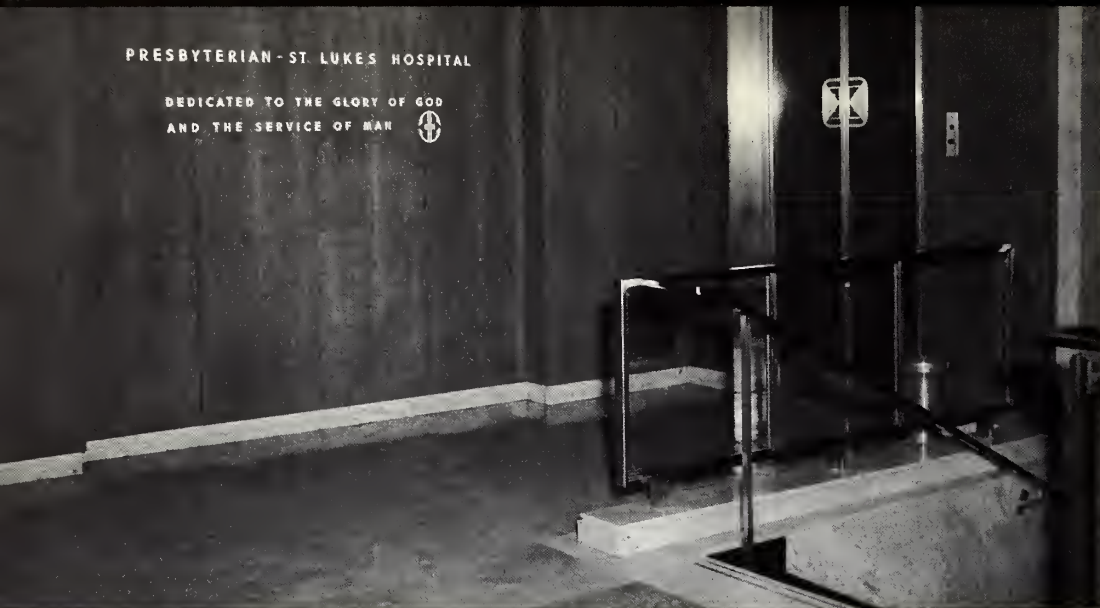

“The chaplains are to co-ordinate their work with the physicians, nurses and other personnel. In each instance the chaplain is a member of a team of which the attending physician is the head.

“The chaplains shall keep such records as will enable them better to serve the patients and the staff.

“The chaplains shall have access to the case records after consultation with the attending physician. Their status as chaplains requires the right to hear and retain confidences, oral or written, according to their pastoral tradition.

“The chaplains may serve as counsellor, teacher, friend or religious adviser for students in nursing or medicine. Each school of professional training should be mindful of the growing knowledge of the care of the sick and the well, by a qualified and accredited chaplain.

“Since the hospital from its foundation has sought to serve persons of all faiths without discrimination, it is

important that the chaplains shall respect the religious affiliation and convictions of the patients and the staff they serve. In their spiritual ministry they shall scrupulously refrain from proselyting and from any urgency that could be so considered. If, because of difference of faith or for other reasons, a chaplain finds his ministry not acceptable to a person, he will be prepared to call in whoever is needed.

"There should be envisaged the possibility and the desirability of a training program in the hospital for theological students, both to aid the chaplains and to improve the quality of pastoral work in the Churches.

"Although the chaplains' main function is ministering to the patients and their families, this is not all they contribute to the hospital. While the Director shapes the attitudes of the workers and the general atmosphere of the hospital, the chaplains can have a definite influence on the morale and well-being of the many members of the staff and employees.

"Through their understanding and poise, word and deed, the chaplains seek to encourage one, relieve another of worry, aid a third to bear suffering, break the grip of despair for a fourth, gain security for one facing death, and to comfort the bereaved, so that individuals may be led to personal growth, deeper understanding of their fellows and increasing consciousness of God."

The Hospital Chaplains each have an office located off the foyer of the Chapel. Dr. Louis W. Sherwin, who has served as Chaplain of Presbyterian Hospital for the past eleven years, represents the United Presbyterian Church. Effective September 1, Reverend William A. Wagner, who presently is Rector of St. George's Church of Chicago, will represent the Protestant Episcopal Church as the other Hospital Chaplain.

The J. Hall Taylor Memorial Chapel is located opposite the elevator lobby on the first floor of the new East Pavilion Building. Dedicated in the fall of 1958, the new Chapel was given to Presbyterian-St. Luke's Hospital by Mrs. J. Hall Taylor and her sons, E. Hall Taylor and James L. Taylor, in memory of the late Mr. Taylor, a member of Presbyterian's Board of Trustees for many years.

The Chapel is open at all hours, day and night, for rest, meditation and prayer, and regular Sunday services are held for everyone—regardless of Church affiliation.

... an integral part
of the hospital's function ...

FOOD SERVICE

The operation of a large hospital's dietary department has no equal in the food service field. Patient trays, approximately 50% of them with varying items to comply with special diets, must reach the patient as quickly as possible after being assembled and, at the same time, hospital personnel, student nurses, doctors and visitors must be fed in the hospital cafeteria.

This cannot be accomplished at the highest level and with high standards of food quality without an efficient flow of work from supply room through preparation to serving of food and return of trays to the dishwashing area. Thus, it is essential to have a Director of Food Service skilled in menu planning, buying and efficient processing and service; to have the supervision of qualified dietitians in the preparation and service areas and on the nursing units; and to have a conveniently located dietary department with adequate facilities, good equipment and a physical layout permitting an efficient flow of work.

Marked advances in hospital food service have taken place in the last thirty years, and in more recent years, extensive studies have been made regarding the most suitable location and arrangement for economical and efficient preparation in the handling of food.

Complementary with these advances is the role of the Dietitian. Dietitians were not always employed by hospitals. However, after World War I, hospitals and medical authorities came to realize that patients' diets not only required skill in cooking but also scientific management and preparation. To accomplish this it became necessary to employ graduate dietitians qualified in the art of feeding people and in the science of nutrition.

Benefitting by the extensive studies made in the field, Presbyterian-St. Luke's planned entirely new food service facilities rather than rehabilitating existing areas. A new building, housing the Central Kitchen on the ground floor and Cafeteria on the first floor,

was constructed in the courtyard surrounded by existing buildings.

The Central Kitchen, designed for efficiency and economy of operation, is open fifteen hours a day to provide food service for the entire hospital.

The Kitchen is divided into three areas—preparation, service, dishwashing.

The "Preparation Area" includes a daily stores room, a salad preparation room, a vegetable preparation room, butcher shop, bake shop, five walk-in iceboxes and a cooking area. In the cooking area, three aisles are equipped to handle specific cooking needs—roasting ovens in one; broilers and deep fat fryers in another; and in the third aisle, kettles for soup and stock, and steamers.

The "Service Area," immediately adjacent to the "Preparation Area," is equipped for centralized patient tray service, an economical system from the standpoint of labor and equipment. Two service lines completely assemble patient trays (as they move along conveyor belts) for delivery by tray carts to the nursing units.

A unique feature of this centralized tray service, and perhaps the most recent innovation in food service distribution methods, is the Thermal Unit Container with "Dri-Heat Hot Plate." A pre-heated metal pellet is placed in the lower portion of a stainless steel container. The standard dinner plate is placed on the pellet and at the end of the service line a stainless steel top, with vent to permit steam to escape, covers the food. There is no loss of food temperature in this type of container, and maintenance is negligible compared to other types of thermal containers.

Also within the "Service Area" are a lift and conveyor to transport dishes and food to the cafeteria work area on the floor above.

The "Dishwashing Area" includes the central dishwashing unit, where dishes are scraped, soaked, if

needed, and conveyed through a large mechanism for washing, rinsing and drying; a pot and pan washing room; and a room where tray carts are washed and steamed after each meal.

The air-conditioned hospital Cafeteria, open at all times from 6:30 a.m. to 12 midnight, provides a very pleasant atmosphere for hospital personnel, student nurses, doctors, and visitors.

The main entrance to the Cafeteria leads directly into the service unit, where two service lines bound the central working area. Included within the working area are a lift and conveyor to transport food and dishes from the Central Kitchen on the floor below; and a griddle used at breakfast-time and for short orders in the afternoon.

The dining area includes a general dining room, two smaller dining rooms, and a conference dining room. A tray belt, located near the Cafeteria exit, conveys soiled trays to the central dishwashing unit on the floor below.

The Central Kitchen and Cafeteria—these are Presbyterian-St. Luke's new food service facilities to prepare and serve the patients' meals and to provide meals in the warm and relaxing atmosphere of the Cafeteria for those who serve the patients. But what of the patients? This is the hospital's primary concern. It is vitally important that food reaches the patient's bedside in an attractive, appealing, appetizing manner, and, most important, still hot.

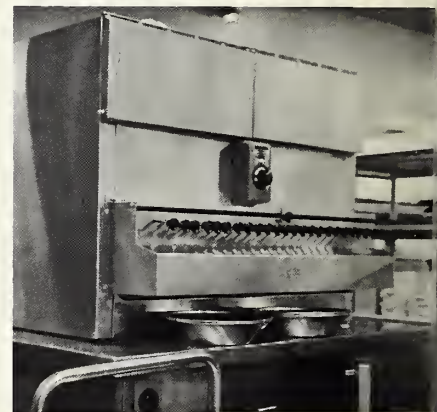

The two essentials of a patient's meal are that they supply physiological needs and that they appeal to the patient. This is the responsibility of the hospital's dietitians, trained in the art of feeding people and in the science of nutrition—a continuing responsibility to the patient to assure his satisfaction, to the greatest possible extent, with the hospital's food service.

the nerve center
is the
CENTRAL KITCHEN

FOOD PREPARATION AREA

Prepared salads, as well as desserts are stored on carts in walk-in icebox

Salad Preparation Room.

Unit for heating metal pellet for "Dri-Heat Hot Plate" located at start of service line. Operator pushes knobs and pellets drop into stainless steel containers.

DISHWASHING AREA

Tray belt conveys trays from Cafeteria down to central dishwashing unit scraping area. Patient trays are scraped on other side of unit where they are brought by tray cart directly from nursing unit.

Vegetable Preparation Room.

Butcher Shop.

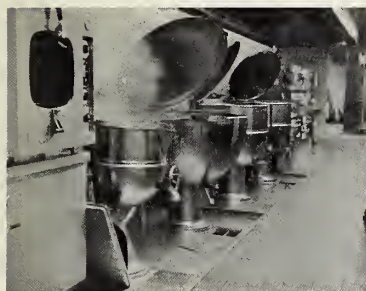

Bake Shop.

Kettles for soup and stock, and high-speed pressure steamer in foreground.

COOKING AISLES

Steamers.

Ranges, deep fat fryers, and broilers.

Roasting ovens.

SERVICE AREA

One of two service lines for assembling patient trays.

Lift, as well as a conveyor, transports food and dishes to Cafeteria work area on floor above.

Dishwashing mechanism in center of central dishwashing unit.

Dishes come out of washing mechanism and are stacked on movable apparatus and returned to service area to await next meal.

Pot and Pan Room.

Tray carts are washed and steamed after each meal and stored in cart room.

CAFETERIA

One of two service lines, immediately inside entrance to Cafeteria, which bound working area.

Food is sent up on conveyor from service area in Central Kitchen.

General dining room seating 338.

Dining room for doctors which seats 66.

Dining room for general use, when not scheduled for meetings, which seats 72. Funds for this were contributed by the United States Steel Corporation.

Lowerators, when attached to electrical outlets, keep dishes warm.

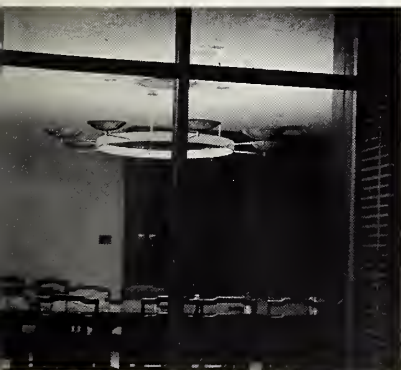

Griddle is used for breakfast and short orders in afternoon.

Tray belt, which conveys trays to central dishwashing unit in Central Kitchen on floor below.

One of two cashiers' desks in exit lobby of Cafeteria.

Conference dining room.

Dietitian on nursing unit transfers necessary information regarding patient's diet from nursing diet cardex, as ordered by the doctor, to dietary cardex.

Dietitian checks menu for next day with patient. Responsible for two nursing units, Dietitian tries to see every patient daily and always checks menus with patients on special diets.

Diet Clerk on nursing unit tallies menu on food order sheet to go to Central Kitchen.

Menu goes to diet office in Central Kitchen where it is checked, charted and sent to tray service line with other menus from the same nursing unit.

A PATIENT'S MEAL

Operator fills heating device with pellet for Thermal Unit Container with "Dri-Heat Hot Plate."

Container with pellet on patient's tray begins its trip down service line. Dinner plate is placed on top of pellet. Patient's menu precedes tray on conveyor belt.

End of service line, where checker looks over menu and tray to be sure tray is completely assembled as ordered; then patient tray with menu is placed in tray cart, along with other trays designated for a specific nursing unit.

Elevator, immediately accessible to service line, is used exclusively for delivering tray cart to nursing unit.

Tray passer on nursing unit removes tray from cart to deliver to patient.

The meal over, satisfied patient calls for tray passer, who removes tray and places it back on cart. Cart is then transported by cart pusher directly to dishwashing area in Central Kitchen.

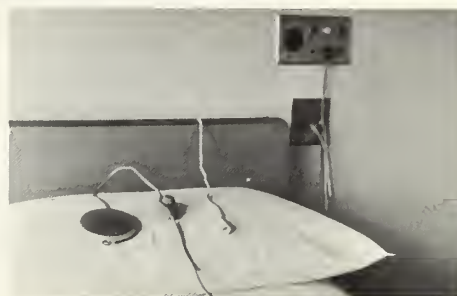

Hi-Fi reproduction equipment, which provides patient selected music and other programs, located on 13th floor of new East Pavilion Building.

**... a special service
to provide pleasure
for the patient ...**

Pillow-speaker equipment for patient selected music and other programs. White cord to right may be pulled to select any one of five channels. Speaker volume is controlled by knob in center.

MUSIC

Located on the 13th floor of the new East Pavilion Building, a small room containing Hi-Fidelity reproduction equipment provides patient selected music and other programs from tapes, recordings and radio broadcasts.

The central control panel has a five-channel system, four of which reproduce AM and FM radio and a fifth channel for specific programs emanating from the hospital on tape, recording, or direct broadcast. At the present time, services from the hospital's Chapel are carried over this fifth channel.

All five channels are available to patients in the East Pavilion through a pillow-speaker system and can be selected as desired by the patient.

In the Psychiatric Unit on the 12th and 13th floors of the East Pavilion, outlets for this Hi-Fi system have been designed for use as music therapy as well as for recreational and entertainment purposes on the Unit.

In addition, outlets are available in the cafeteria, Gift Shop, X-ray Department, doctors' lounge, and main lounge of the hospital.

This music system has been given to the hospital in memory of Burton W. Hales by members of the family, and, in addition, the Burton W. Hales Memorial Fund will be used for special equipment, records and tapes for this music system.

Drs. Paul W. Greeley, Clarence W. Monroe and John W. Curtin were in Boston in May to attend the American Association of Plastic Surgeons' meeting. Drs. Greeley and Curtin presented a paper on "Osteochondroma of Mandibular Condyle," and Dr. Monroe gave a paper entitled "Surgical Factors Influencing Bone Growth in the Middle Third of the Upper Jaw in Cleft Palate."

In April, Dr. Curtin went to Philadelphia for the Cleft Palate Association meeting, and Dr. Greeley was in California to appear as Guest Speaker before the California Society of Plastic Surgeons. His subject: "New Supplementary Procedure for the Treatment of Facial Paralysis."

In May, *Dr. Geza de Takats* spoke before the Academy of Surgery in Detroit on "Intermittent Claudication." In June, he attended the International Cardiovascular Society meeting in Atlantic City.

Drs. John T. Reynolds, Warren H. Cole and R. K. Gilchrist were among those members of the Medical Staff attending the April meeting of the American Surgical Association in San Francisco.

In May, Dr. Reynolds was in French Lick, Indiana, to moderate a panel discussion on "Surgical Bacteriology" before a joint meeting of the Indiana and Kentucky Chapters, American College of Surgeons, and Kentucky Surgical Society.

Dr. Cole attended the late April meeting of the American Goiter Association held in Chicago, and in March, Dr. Gilchrist addressed the Nashville Surgical Society. His subject: "The Cancer Patient is Entitled to an Optimistic Surgeon."

Dr. Robert W. Carton was in Atlantic City in April to present a paper before the Federated Societies for Biology and Medicine on "Studies of Pulmonary Elastic Tissue" (with Dr. C. Bruce Taylor and Beverly Tews). In late May, Dr. Carton presented a paper before the American Trudeau Society on "Isolation of the Elastic Tissue of the Lung" (also with Dr. Taylor and Miss Tews).

In New Orleans in April, *Dr. John S. Garvin* attended the Harvey Cushing Society meeting, and in May, he spoke at the Winnetka Auxiliary of the Presbyterian Woman's Board's annual benefit. His subject: "Recent Neurological Treatments."

The 40th Annual Session of the American College of Physicians was held in Chicago in April, with some of the meetings being held at the hospital. Many members of the Medical Staff attended this Session and those participating in the program included:

Drs. Robert M. Kark and Richard B. Capps discussing "The Patient with Hepatomegaly" on closed circuit TV.

Dr. Howard Wakefield, who appeared on a TV panel discussion, "The Consultation Room."

Dr. John T. Reynolds discussing "Gross Hematemesis" on TV.

Dr. James A. Campbell, who moderated a panel on "Follow-Up After Cardiac Surgery."

Dr. John S. Graettinger participating in a panel discussion on "Electrocardiography." Dr. Graettinger served as Assistant to the Marshal at Convocation during the Session.

Dr. Samuel G. Taylor, III, who presented two papers: "Endocrine Therapy and Surgery in Malignancy" and "Opportunities for the Internist in Palliation of Disseminated Cancer."

Dr. R. K. Gilchrist participating in a panel discussion on "Plain Roentgen Film of Abdomen: Uses and Pitfalls."

Dr. Roland P. Mackay lecturing on "The Neurological Complications of Diabetes."

Dr. Chester Coggeshall, who presented a paper on "Diabetes Retinopathy."

Dr. Evan M. Barton, who presented a Clinic on "Rheumatoid Spondylitis."

Dr. John S. Garvin participating in a panel discussion of "Diseases of Muscle Metabolism."

In May, *Dr. Heyworth N. Sanford* attended meetings of the Wisconsin State Medical Society in Milwaukee and the American Pediatrics Society in Buck Hill Falls, Pa. In Milwaukee, Dr. Sanford presented two papers: "Para-Natal Mortality" and "Infection in Newborn." In Buck Hill Falls, his subject was: "Occurrence of Sex Linked Coagulation Defect and an Autosomal Defect in a Family and in a Single Individual."

Drs. Oscar Sugar, Paul H. Holinger and John B. Haeberlin, Jr. participated in the program of the American Association of Railway Surgeons' meeting held at The Drake in April. Dr. Holinger presented a paper on "Indications and Limitations of Bronchoscopy in Lesions of the Lungs." Dr. Sugar's paper was entitled "Surgical Techniques in the Management of Pain;" and Dr. Haeberlin's, "Contact Dermatitis."

"Pre-Malignant and Malignant Lesions of the Larynx" was Dr.

Holinger's subject in a lecture he gave at a Symposium of Otorhinolaryngology at the Indiana University Medical Center in April.

In Atlantic City recently, Dr. Haeberlin and *Clark W. Finnerud* attended the American Dermatological Association meeting where Dr. Haeberlin presented a paper entitled "Primary Irritation of the Skin: Observations on Threshold Reactions."

Drs. Sugar, *Robert M. Kark, Paul W. Searles and Digby G. Seymour* presented papers before the Illinois State Medical Society meeting held at the Sherman Hotel in May. Drs. Seymour's and Searles' subject was "Anesthesia for the Geriatric Urological Patient;" Dr. Sugar's, "The Unconscious Injured Patient;" and Dr. Kark's subject: "How To Stay Young."

Dr. Kark has been invited by the Post Graduate Medical Committee of the University of Sydney to be the second Pfizer Lecturer in New Zealand and Australian medical schools. He will leave the end of June to spend a week each at six schools and on his return trip will visit medical schools in Indonesia, Malaya, Burma, Ceylon, Turkey and Greece.

In mid-April, *Drs. Wesley A. Gustafson, Burton C. Kilbourne, Robert D. Ray and Kenneth C. Johnston* participated in the program of the 3rd Post Graduate Course on Trauma, Chicago Committee on Trauma, American College of Surgeons. Dr. Kilbourne presided at the meeting; Dr. Gustafson lectured on "Injuries of the Cervical Spine due to Automobile Accidents;" Dr. Ray spoke on "Bone Grafts and Bone Implants;" and Dr. Johnston's subject was "Early Management of Laryngeal and Tracheal Trauma."

In May, Dr. Johnston attended the Wisconsin-Upper Michigan Society of Ophthalmology and Otolaryngology meeting in Green Bay where he gave a paper on "Respiratory Obstruction in the Newborn and Management of Laryngeal Trauma."

In March, Dr. Gustafson was in Texas to attend the Houston Neurological Society meeting.

Dr. Ray spoke before the Champaign County Medical Society in April on "Metabolism of the Bone."

Drs. Kilbourne, *Frank V. Theis and George W. Stuppy* attended the recent Spring Conference of the Chicago Medical Society, where Dr. Kilbourne participated in a panel discussion, "Hand Injuries," and Dr. Theis gave a color TV presentation on "Varicose Veins and Ulcers."

In late April, members of the Chicago Surgical Society, including Drs. Kilbourne, Theis, *Francis H. Straus, E. Lee Strohl, Frederic A. dePeyster and Edwin M. Miller*, were in Philadelphia to meet with the Philadelphia Surgeons. In early May, Dr. Straus presented a paper before the Society entitled "Leiomyo-Sarcoma of the Stomach" (with Dr. Paul P. Nora).

Dr. Strohl was in Boston in mid-May to attend the meeting of the Surgeons Travel Club.

Dr. Claude N. Lambert attended the May meeting of the Contemporary Orthopaedic Society in Grand Rapids, and the June meeting of the American Orthopaedic Association in Lake Placid.

ELECTIONS AND APPOINTMENTS

Dr. John T. Reynolds, re-elected Secretary, Western Surgical Association.

Dr. R. K. Gilchrist, Member, American Board of Surgery.

Dr. Norris J. Heckel, re-elected Chairman, Advisory Committee on Urology, American College of Surgeons.

Dr. Robert J. Jensik, Vice President, North-Shore Branch, Chicago Medical Society.

Dr. E. Lee Strohl, Director, Municipal Tuberculosis Sanatorium.

Dr. Harry W. Southwick, re-elected Secretary-Treasurer, Society of Head and Neck Surgeons.

Dr. Danely P. Slaughter, Member, Executive Council, Society of Head and Neck Surgeons.

Dr. Chester Coggeshall, re-elected Director, Chicago Diabetes Association.

Dr. George W. Stuppy, President-Elect, University of Chicago Medical Alumni Association.

Dr. Steven G. Economou, Member, American Association for Cancer Research.

Dr. Lowell F. Peterson, National Chairman, Audiovisual Committee, American College of Obstetricians and Gynecologists.

Dr. Warren H. Cole, President, American Surgical Association.

Dr. James A. Campbell, Vice-Chairman, Board of Directors, National Internship Matching Program, Inc.

Dr. John S. Graettinger, Fellow, American College of Physicians.

Dr. Daniel H. Callahan, Member, American Urological Association, Inc.

Dr. William F. Hughes, Editor, Yearbook of Ophthalmology.

Dr. Edward C. Holmblad, Medical Director, Division of Medical Services, Illinois Public Aid Commission.

At the Mary Thompson Hospital in early April, Dr. Daniel H. Callahan presented a paper, "Male Infertility," before the American Medical Woman's Association, Branch Number Two.

Dr. Howard L. Wilder gave three talks in April to the University of Michigan Post Graduate Course in Ophthalmology. His subjects: "Corneal Surgery in Complicated Cases;" "Irregular Corneo-Scleral Grafts;" and "High and Low Point of Cataract Surgery."

Drs. David W. Steed, Donovan G. Wright, David I. Cheifetz, Paul E. Neilson, and L. J. Meduna attended the annual meeting of the American Psychiatric Association in Philadelphia in April where Drs. Cheifetz and Nielson gave a paper on "A Method of Objectively Evaluating Certain Aspects of Teaching Psychiatry to Medical Students."

Also in April, Dr. Steed attended the meeting of the American Psychoanalytic Association; and Dr. Meduna presented a paper, "The Use of a Hallucinogenic in the Treatment of Depressions," before the American Society of Medical Psychiatry. Dr. Meduna received an Honorary Diploma from this Society.

Drs. William F. Mengert, John S. Long and Lowell F. Peterson were in Atlantic City in early April for the 7th Annual Clinical Meeting of the American College of Obstetricians and Gynecologists. Dr. Long led a round table discussion on "Choice of Hysterectomy," and Dr. Peterson presented a film, "Cardiac Arrest."

In May, Drs. Mengert and Edward Allen went to Hot Springs for the American Gynecological Society meeting.

Drs. Long and John S. Graettinger were among those members of the Staff who presented papers before the Chicago Urological Society, which met at the hospital in early April. Dr. Long's subject was "A New Look at Stress Incontinence;" Dr. Graettinger's, "Basic Principles in Appraising Pulmonary Insufficiency in the Elderly Surgical Patient."

Drs. Norris J. Heckel and James A. Calams attended the April meeting of the American Urological Association in Atlantic City. As a Traveling Fellow, North Central Section, of this Association, Dr. Calams recently visited Johns Hopkins, Georgetown, Duke and Bowman-Gray Colleges of Medicine investigating urological training programs.

In early June, Drs. Heckel and George P. Guibor attended the meeting of the American Geriatrics Association in Atlantic City, where Dr. Heckel presented a paper entitled "Management of Prostatic Disease in the Aged."

In mid-March, Dr. Guibor was in Baltimore to attend the Wilmer Ophthalmology Institute.

Dr. Evan M. Barton recently was in Washington, D.C., to attend the Pan-American Rheumatological Congress.

Dr. Frank R. Hendricksen attended the Radium Society meeting in Hot Springs in early April, and later in the month he presented a paper, "The Place of Radioactive Isotopes in the Community Hospital," before the Iowa State Medical Society in Des Moines.

At the Residents' Meeting of the Chicago Society of Internal Medicine in late April, Dr. David Baldwin presented a paper on "Chronic Sodium Chloride Challenge Studies in Man" (with Drs. Ernest Warner and R. W. Alexander).

"Persistent Experimental Aortic Aneurysms in Dogs," was Dr. Carl Davis, Jr.'s paper recently presented before the Society for Vascular Surgery's meeting in Atlantic City.

Dr. Charles B. Puestow was abroad in April and May, at which time he gave an address at the University of Madrid on "Chronic Relapsing Pancreatitis," and also addressed the Association of Surgeons of Great Britain and Ireland. His subject: "Retrograde Pancreaticojejunostomy for Chronic Relapsing Pancreatitis."

In Atlantic City recently, Dr. Frank B. Kelly, Sr. attended the meeting of the American Therapeutic Society.

Dr. C. Bruce Taylor recently presented a paper before the Federated Biological Societies entitled "Neutral Fat Versus Cholesterol in Cholesterolemia in Rhesus Monkeys" (with G. E. Cox, M. Counts, N. Yogi); and before the American Association of Pathologists and

Bacteriologists, Dr. Taylor gave a paper on "Fatal Myocardial in Rhesus Monkey with Diet Induced Hyper Cholesterolemia" (with G. E. Cox, Joanne Woods and J. Alvarez).

In early May, Dr. James A. Campbell went to Ann Arbor to attend the Central Clinical Research Club meeting, and to Atlantic City for a meeting of the American Society for Clinical Investigation.

Drs. Roland P. Mackay and Donald D. Layton will attend the mid-June meeting of the American Neurological Association and Society for Biological Psychiatry in Atlantic City, where Dr. Mackay will speak on "Neurological Aspects of Free Will."

In March, Dr. Mackay gave two lectures—one on the headache, the other on epilepsy—at the University of Iowa.

Dr. Layton has been giving weekly lectures in Neuropathology at Manteno State Hospital.

Dr. Richard H. Andresen recently presented a paper before the American Society for Experimental Pathology entitled "Homologous Tissue Reactions Following Cross-Transfusions of Disrupted Leucocytes" (with C. W. Monroe, G. M. Hass, D. A. Madden and S. Pappas).

As Representative Member of the American Psychiatric Association, Dr. Alfred P. Solomon attended the March meeting of the Liaison Committee of the American Psychiatric Association and American Hospital Association.

In April, Dr. Solomon attended the Regional Planning Conference of the American Hospital Association, participating in a Workshop for "Planning the Proper Balance Between Types of Patient Care Facilities" and "Planning for Distribution of Patient Care Facilities in a Related Geographic Area."

At the American Society of Maxillofacial Surgeons' meeting in May, Dr. Louis W. Schultz presented papers on "Electric Burns of the Face" and "Preliminary Report—A New Treatment for Ameloblastomas."

Dr. William F. Moncreiff went to Austria in May to present a paper before the Ophthalmologische Gesellschaft in Wien. His subject: "Congenital Cataract: Visual and Surgical Problems." While abroad, Dr. Moncreiff visited eye clinics and hospitals in Venice, Florence, Rome, Barcelona and Madrid.

"Complications with the Use of Steroids in the Surgical Patient" was Dr. Eugene F. Traut's paper given at the Annual Clinical and Scientific Meeting of the Illinois Surgical Society held in May.

In April, Dr. Robert J. Jensik discussed the "Adjuvant Therapy Program on Lung Cancer" at a meeting of the Kenosha, Wisconsin, County Medical Society, and also was in Los Angeles for the meeting of the American Association of Thoracic Surgery.

Drs. Samuel G. Taylor, III and Harry W. Southwick were in New York City early in April to attend the James Ewing Society meeting. Dr. Taylor presented a paper on "Rate of C14 Formate Uptake Correlation with Clinical Course of Disseminated Cancer."

From New York, Dr. Southwick went on to Montreal to present papers before the Sectional Meeting of the American College of Surgeons. His subjects: "Chemotherapy of Cancer" and "Adequate Surgery for Head and Neck Cancer."

Drs. Taylor and Danelly P. Slaughter participated in the program of the 7th Annual Spring Post Graduate Assembly at the University of Nebraska. Dr. Slaughter spoke on "Recognition of Cancer" and "Debatable Tumors," and participated in a panel discussing "Tumors of the Head and Neck." Dr. Taylor's subjects: "Endocrine Diagnostic Problems," "Recent Advances of Corticoid Therapy," and "Medical Management of Disseminated Cancer."

In March, Dr. Slaughter was in Los Angeles to present two papers before the College of Medical Evangelists. His subjects: "The Diagnosis of Accessible Cancer" and "Management of Breast Cancer."

DR. HOLMBLAD HONORED

At the 44th Annual Banquet of the Industrial Medical Association, held in the Hotel Sherman in April, a testimonial was presented in honor of Dr. Edward C. Holmblad, retiring Managing Director of the Association.

In addition to this honor, Dr. Holmblad recently received a Citation for Meritorious Service presented by the President's Committee on Employment of the Physically Handicapped.

(Editor's note: This year's American Medical Association meeting recently was held in Atlantic City. Many members of the Hospital's Medical Staff—too numerous to mention—attended this meeting.)

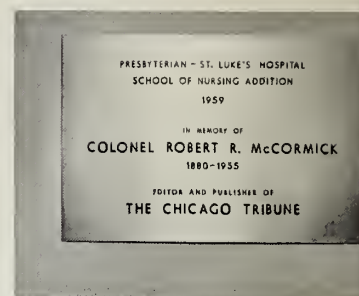

NEWS BRIEFS

At the St. Luke's Shop's 20th Anniversary Party, Mrs. Eric Oldberg, right, Chairman of the Shop Committee, cuts the first pieces of anniversary cake for Mrs. Selim McArthur, left, and Miss Lyla Woodruff. Mrs. McArthur and Miss Woodruff started The Shop under the auspices of the St. Luke's Woman's Board, and in twenty years, The Shop's assets and earnings grew to more than fourteen times the original investment of \$7,000, which was advanced by the Board to found the enterprise.

Student Nurse Chorus sings "Happy Birthday" as three Past-Presidents (Mrs. Burton Hales, left, Mrs. Allin Ingalls, second from right, Mrs. Clyde Shorey, right) and President (Mrs. Charles Balfanz) light candles on the Presbyterian Woman's Board's 75th Anniversary cake. The anniversary celebration, held recently in the School of Nursing, featured a narrative and vignette depicting the Board's seventy-five years of service to the hospital.

ID BRACELETS IN USE

Identification bracelets for patients are now being used throughout the hospital.

Made of plastic, the bracelets are snapped on a patient's wrist by the admitting clerk and cannot be removed without cutting.

A paper strip, indicating name, doctor, and case number, taken from the patient's addressograph plate, is inserted into the bracelet.

FUNDS PROVIDED FOR STUDY

A "Study of Subjective Aspects of Patient Care" is now being undertaken at the hospital. Funds for this Study were provided by the Commonwealth Fund of New York City under an \$86,000 two-year grant.

Of country-wide importance in the hospital field, the purpose of the Study is "to investigate the bases from which patients judge care as good or bad and to determine the social, psychological and possibly medical reasons behind patients' expectations and judgments of medical care, nursing care and hospital services."

Under the grant, a Department of Patient Care Research, directly responsible to hospital administration, has been established to undertake this Study and to serve as a nucleus for further research activities in patient care on a permanent basis. The department, one of the first of its kind in the country, is under the direction of Hans O. Mauksch, Chairman, Department of Social Science, Presbyterian-St. Luke's Hospital School of Nursing.

NEW APPOINTMENTS ANNOUNCED

The following appointments have been announced by the hospital administration:

John E. Milton, Assistant Director. Prior to this appointment, Mr. Milton served as Administrator of Edward Hospital in Naperville, Illinois, for three years. A graduate of Northwestern University's Program in Hospital Administration, he served his administrative residency and assistantship at Presbyterian.

Frank Allan Lynch, Administrative Assistant. Mr. Lynch has been associated with the

St. Luke's division since 1951 as Director of Patients' Services. He is a graduate of the Program in Hospital Administration at Northwestern and of the Bellevue Hospital Schools of Nursing.

James R. Kelly, Administrative Assistant. Mr. Kelly has served the St. Luke's division since 1929 in a variety of capacities, most recently as Assistant to the Administrator.

Miss Sally Foster, Director of Social Service. Miss Foster has served in this capacity at St. Luke's since 1952.

George Peterson, Superintendent of Maintenance. Mr. Peterson came to the Presbyterian division in 1957 as Building Service Supervisor.

Leo Knapp, Chief Engineer. Mr. Knapp has been with St. Luke's since 1935 and became that division's Chief Engineer in 1957.

MR. BRADY HEADS SOCIETY

Norman A. Brady, Associate Director of Presbyterian-St. Luke's, served as Host at a three-day meeting of the Society of Hospital Administrative Associates held at the Lake Shore Club on April 30, May 1 and 2.

Mr. Brady was elected 1959-60 President of the Society, which is composed of the administrators of the twenty-five largest hospitals in the eastern half of the country.

On the final day of the meeting, James M. Kittleman, Director of Resources and Development, and Earl Soder, Controller of the hospital, participated in the program. Their subject: "Fiscal Planning in Today's Hospital."

NEW INTERNSHIPS BEGIN

On July 1, twenty-five doctors will begin their year's internship at the hospital.

The new interns represent eleven medical schools throughout the country: University of Illinois, 7; University of Chicago, 4; Baylor University, 4; Stritch School of Medicine, 3; and one each from Marquette University, Washington University, University of Louisville, Tufts University, University of California, St. Louis University, and Woman's Medical College.

WOMAN'S BOARD PRESENTS GIFTS

A Portable X-ray Machine and six Dictaphone

Telecord Recording Machines have been presented to the hospital by the St. Luke's Woman's Board.

The X-ray machine is more powerful than the usual machine of this type and will be used in the Operating Room.

The dictaphone machines, to be installed in the new Central Dictating Room, will provide the very latest system for medical dictation. This system enables doctors to do their medical dictating from any telephone within the hospital which is connected with the main switchboard. By merely dialing a predetermined code number, a doctor's call is automatically relayed through the main switchboard to one of the six machines. If all machines are in use a busy signal sounds.

This system will expedite the completion of medical-clinical records.

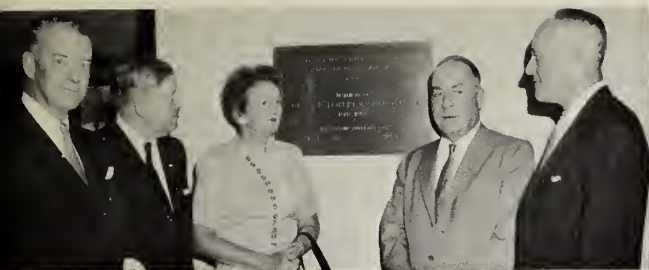

ALUMNAE PLANNING MERGER

The Alumnae Associations of the Presbyterian and St. Luke's Schools of Nursing are in the process of drafting by-laws. A special committee, with equal representation from each Association, has been formed for the purpose of drawing up the by-laws for a new merged alumnae group to be known as the Presbyterian-St. Luke's Alumnae Association.

VOLUNTEERS HONORED

On May 20th, St. Luke's Annual Volunteer Tea was held in Schweppe Memorial Nurses' Residence, at which time thirty-seven Volunteers received awards for their service to the hospital during the past year. From May 1, 1958 to May 1, 1959, St. Luke's Volunteers have contributed a total of 7,274 hours, and top individual honors went to Mrs. Howard Edson for her contribution of 786 hours of volunteer service.

Presbyterian's Annual Volunteer Award Meeting and Luncheon were held in the School of Nursing on June 1, in conjunction with the Presbyterian Woman's Board monthly meeting. At this time 83 Volunteers received awards for their service to the hospital, and the top award was presented to Mrs. Frederick J. Price for contributing 1,226

Pictured by The Robert R. McCormick School of Nursing Addition memorial plaque in the lobby of the School are, left to right: Harold J. Nutting, Chairman, Board of Trustees; W. D. Maxwell, Editor, The Chicago Tribune; Edith D. Payne, Director, Department of Nursing; Chesser M. Campbell, President, The Tribune Company; and J. Howard Wood, Vice President, The Tribune Company.

A luncheon to dedicate the 56-room addition to the School, funds for which were provided by the Robert R. McCormick Charitable Trust, was held on May 21 in the School. Others attending this function included members of the hospital's Board of Trustees, Medical Staff, Woman's Board, Administration, and Nursing Faculty.

hours of volunteer service. Presbyterian's Volunteers have contributed a total of 19,041 hours during this past year.

COMBINED BOARD TO HOLD ELECTIONS

The Presbyterian and St. Luke's Woman's Boards will hold their first joint meeting on June 22, at which time elections to offices on the Presbyterian-St. Luke's Woman's Board will be held.

The slate of officers for the combined Board was presented to members in early June, and those officers elected at the June 22nd meeting will take office at the Annual Meeting in September.

TEA ROOM TO OPEN

The Garden Grill, formerly operated by Presbyterian Hospital, has been closed for renovation. It is scheduled to reopen this summer under the management of the Shop-Tea Room Committee of the new Woman's Board and will be called "The Tea Room."

SERVICE AWARDS PRESENTED

In observance of National Hospital Week in May, Hospital Day Receptions were held at both divisions.

At Presbyterian's Hospital Day Reception on May 12 in the School of Nursing, Harold J. Nutting, Chairman, Presbyterian-St. Luke's Board of Trustees, presented awards to twenty-two employees for 10, 25, and 40 years of service to the hospital. Special tribute was paid to two forty-year employees—Anna Serak, Housekeeping, and Peter Piperoff, Engineering.

On May 14 at St. Luke's, William F. Borland, Vice President, Board of Trustees, presented awards to thirty-six employees for 10, 15, 20, 25, and 40 years of service, with special tribute being paid to Dr. Edwin F. Hirsch for his Fortieth Anniversary as Director of St. Luke's Pathology Department. In addition, members of St. Luke's Woman's Board, Medical Staff, and Woman's Auxiliary received awards for 10, 15, 20, and 25 years of service.

MERGER
COMPLETE

"... a far-reaching decision has been made. After two years of painstaking deliberation and careful examination of all factors, the Board of Trustees of St. Luke's Hospital and the Board of Managers of Presbyterian Hospital voted on April 12 to merge the facilities of these two fine hospitals into one great medical institution that will be known as 'Presbyterian-St. Luke's Hospital.'

"Basically the goal is to provide better patient care. To create in Chicago an institution of nation-wide importance can only mean the finest medical facilities backed by the strongest program of medical education and research. The reputation of the combined Staffs is second to none...

"... I promise that under the joint leadership of an active Board of Trustees and truly eminent Staff, there will develop an institution of which you will pridefully wish to be a part."

JOHN P. BENT,
PRESIDENT, BOARD OF TRUSTEES—APRIL 1956

... And so it came to be. On June 26, 1959, the last patient was discharged from St. Luke's Hospital on Michigan Avenue and by July 1, the complete physical merger of Presbyterian and St. Luke's Hospitals

**A YOUNG PATIENT
IS TRANSFERRED**

in Chicago's West Side Medical Center had been accomplished.

The physical merger began in February of this year when patients, personnel and equipment from St. Luke's Department of Neuropsychiatry were transferred to the west side. Gradual transfer of other patients, personnel and equipment ensued from this date on and, concurrently, doctors at St. Luke's began to admit their patients to the new hospital. By June 1, St. Luke's bed occupancy was down to approximately 150.

There was no large exodus of patients from Michigan Avenue to the west side at any time. The gradual moves were so scheduled as to eliminate a mass transfer of patients. The majority of them were ready to be discharged prior to the scheduled departmental moves. Throughout these months of physical merger, it was necessary to transfer a total of only 41 patients.

On July 20, the St. Luke's buildings on Michigan and Indiana Avenues were turned over to the real estate firm of Draper & Kramer to maintain, guard, and act as agent for the property until such time as the buildings are sold.

Last patient is discharged as St. Luke's closes. Left to right: Norman A. Brady, Associate Director; William F. Borland, Vice President, Board of Trustees; Harold J. Nutting, Chairman, Board of Trustees; Dr. Edwin F. Hirsch; Mrs. Eric Oldberg, Woman's Board; John P. Bent, President, Board of Trustees; Mrs. Fentress Ott, President, Woman's Board; Edith D. Payne, Director, Department of Nursing; Dr. Raymond Anderson, patient's doctor; Marie Steinke, Assistant Director, Nursing Service; Mrs. Helen Schwenger, last patient; and student nurse, Judy Greenquist.

Thus, three years and four months of planning, organizing and gradual consolidation have come to a close. Presbyterian-St. Luke's, one hospital, has begun a new era of service to Chicago and the Midwest, and looks to its future growth as one of the nation's outstanding institutions of medical service, teaching and research.

That far-reaching decision made in April 1956 has been consummated.

Waiting at St. Luke's. He knows something is up.

Down the elevator. He felt much happier being carried than riding on the ambulance cart.

A bit puzzled as he and Nurse's Aide reach first floor.

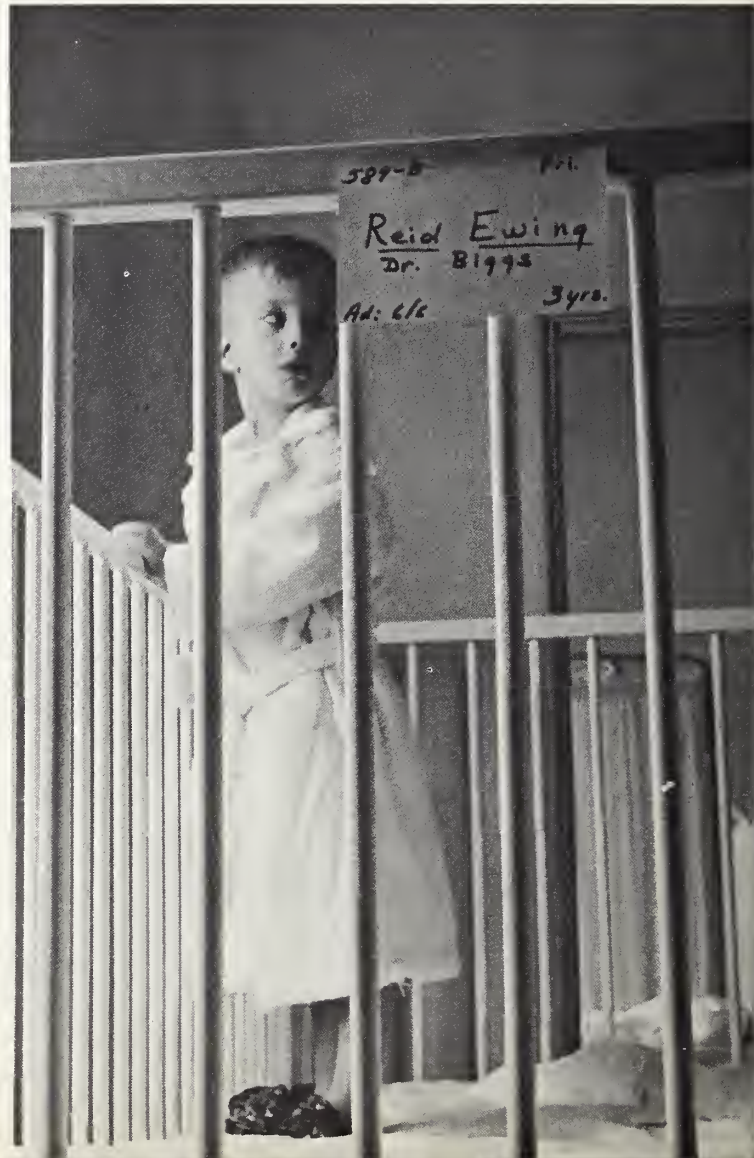

On Indiana Avenue

Nursing Staff on floor says good-bye.

In his new bed—still not sure what it's all about.

A YOUNG PATIENT IS TRANSFERRED

Now things are getting a little more interesting as the ambulance heads for the new hospital.

Arrival at the Pediatrics nursing station where Licensed Practical Nurse, who came with him, checks in.

Soon the excitement is over and Reid becomes curious about his new surroundings and next-door neighbors.

*"To each doubting Thomas who has long argued
that it takes a professional mannequin to show
off the gowns and wraps, negligees and slippers,
jewels and hats of the hour, proof was given yesterday
that the good looking and fashionable young
women of the town can hold their own in a style show.*

*"For weeks the industrious women on the
St. Luke's Hospital Board, under the leadership of
Mrs. John W. Gary, have been working up
enthusiasm for the fashion display which they decided
to put on this year instead of the annual ball,
and from 3 o'clock yesterday, when tea
was served to an eager and almost entirely
feminine audience through the dinner hour, when the
men put in their appearance, the black and gold
runway down the length of the Stevens Hotel ballroom
presented as brilliant and well offered showing
of smart bib and tucker as the most blasé
fashion follower could ask. . . ."*

... THE CHICAGO TRIBUNE, October 28, 1927

Editor's note: We are grateful to THE CHICAGO TRIBUNE and Eleanor Page for their kind help in the preparation of this article.

Some of this year's models visit The Pure Oil Company Research Center. Back row, left to right: Mrs. William Bartholomay, Mrs. Cyrus MacKinnon, Mrs. Thomas Donnelly II. Front row, left to right: Mrs. Joseph O'Neil, Jr., Mrs. William Covington, Jr., Mrs. Philip Hummer, Mrs. Gordon Craighead, Jr., Mrs. John Dern, Jr., Mrs. John Mayo, Mrs. Jay Whipple, Jr.

FASHION FOR FUNDS

On October 27, 1927, the St. Luke's Woman's Board made history in the World of Fashion.

On October 14, 1959, the 33rd Annual St. Luke's Fashion Show and 4th Presbyterian-St. Luke's Hospital Benefit will attract some 4,000 women interested in a display of the latest fashions from Chicago's outstanding stores and shops.

The idea for this Fashion Show—planned, produced and participated in by amateurs—was originated by Mrs. Frank Hibbard and Mrs. Walter B. Wolf (both still members of the Woman's Board).

In their first production in 1927, the Woman's Board raised approximately \$22,000 for St. Luke's Hospital. Last year, the net proceeds for the benefit of Presbyterian-St. Luke's Hospital totalled \$67,145.

This annual event is such a tremendous undertaking that as soon as the curtain falls on one year's Show, planning for the ensuing year's Show begins. A variety of committees is necessary to carry out the volume of work involved: Advisory, Boxes, Clothes, Continuity, Exhibitors, Fashion Review, Mannequins, Nurses' Finale, Program, Properties, Publicity, Sale of Programs, Stage-Setting, Tickets, Miscellaneous, and, most recently, Television. All of these committees work under the direction of the President of the Woman's

Board and the Fashion Show Chairman—this year, Mrs. Fentress Ott and Mrs. Herbert C. DeYoung, respectively.

Since 1945, the elaborate stage-settings for the Fashion Show have been designed and donated by a collaborator. This year's collaborator is The Pure Oil Company. Those in past years have included: Marshall Field and Company, United Air Lines, Sante Fe Railroad, The Admiral Corporation, The Ambassador Hotels, Cities Service Oil Company, Packard Motor Car Company, Bonwit Teller, and The Texas Company.

The complexities of staging a production in a large theatre with such an elaborate set have required the use of the talents of professional stage directors. Kay Ratto and Helen Tieken Geraghty (a member of the Woman's Board) are among those who have given their professional services.

In 1927, 70 models participated in the first St. Luke's Fashion Show. This year approximately 145 models will introduce the latest creations of the Fashion World.

To model in the St. Luke's Show, a candidate must be endorsed by a member of the Woman's Board. Exhibitors, who plan their exhibits well in advance,

indicate the type of model needed. The Mannequin Committee, which has data on all candidates—age, general appearance, color of hair and complexion—assigns models accordingly.

For those mannequins who have never modelled before, professional instruction is provided. The late Patricia Stevens and her staff donated their time for this purpose for a number of years.

On the day of the Show, activity backstage begins at 8:00 a.m. as members of the Woman's Board on the dressing-room crew get ready for the job ahead. Exhibitors deliver their clothes and accessories early. Models start arriving at 9:00 a.m. Maids, pressers, dressers and stage hands all go about their duties in an orderly fashion. A corps of make-up artists, contributed by Elizabeth Arden, prepare the models for their stage appearance. And later on, box lunches, donated by Fred Harvey Restaurants, are delivered for models and backstage workers. Soon the zero hour approaches and the house lights dim.

Another St. Luke's Fashion Show begins, and, as THE CHICAGO TRIBUNE reported thirty-two years ago, proof once again is given that "the good-looking and fashionable young women of the town can hold their own in a style show."

**a few fashion show
"FAIR LADIES"
of the past**

1927: Mrs. Peter Berkey, left, and Mrs. James E. Baggot, Jr. modeling jewelry from Spaulding.

1951: Mrs. Vernon Armour in champagne taffeta gown with black Chantilly lace.

1957: Mrs. Arthur Dole, Jr. in a snow drift fitted beaver coat trimmed with luscious dark mink collar and cuffs.

1937: Miss Elise Clow (now Mrs. Burke Williamson) looked as though she had come straight from the frozen steppes of Russia in a Persian lamb jacket and hat and spiral muff.

1942: Mrs. George S. Chappell, Jr. in sleeky black dinner gown accented by midriff of multi-colored stripes and a flaming red sash with ends that hung to the floor in front.

1942: Mrs. Walter L. Cherry, Jr. in bride's gown of pink slipper satin, fez-like cap and pink tulle veil.

1944: Mrs. A. Watson Armour III, in a crepe dinner dress.

1948: Mrs. Robert W. Carton in coat and dress ensemble in brown and gray.

1951: Mrs. Hill Blackett, Jr. in red fleece coat with surah dress.

1957: Mrs. James B. Braun in beige dance dress with lantern skirt made of 20 yards of silk chiffon.

The Unit's Nursing Station, showing Diet Kitchen in background. (Portable TV set is available at all times for patients.)

Nurse prepares special formula diet in Unit's Diet Kitchen.

METABOLIC UNIT

—a little hospital within a hospital

Two single patient rooms, a diet kitchen, a laboratory, a nurse's station, and a bath comprise the compact physical layout of Presbyterian-St. Luke's Metabolic Unit for the treatment and study of patients with metabolic disorders. (The term "metabolic" refers to the various mechanisms within the body which regulate the build-up and breakdown of body tissue, such as muscle, bone, and fat.)

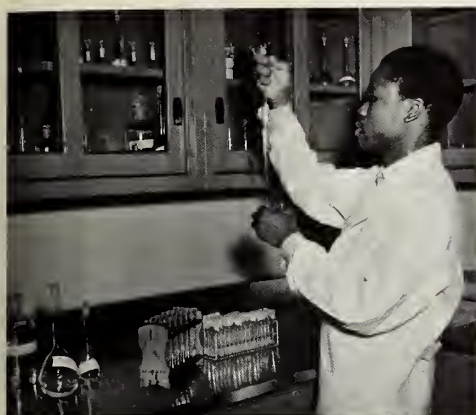

In that it is completely self-sufficient—a little hospital within a hospital—the Unit is unique. Everything is available within the Unit for the total care of the patient: the preparation of all food, the control of the patient's physical environment through a temperature and humidity control unit, and the analysis of all specimens in the Unit's laboratory. Only those patients who agree to fully cooperate in their care and treatment and who have a complete understanding of the routine of the Unit are admitted to the Unit. The patient's strict supervision of himself plays an important part in his total care.

Under the direction of Dr. Theodore B. Schwartz, Head of the Section of Endocrinology and Metabolism, the Unit lends itself to intensive care and treatment as well as intensive investigative studies.

Because of the specialized nature of the treatment given and the studies being undertaken, special personnel are assigned to the Unit—residents in Endocrinology and Metabolism, a graduate nurse, and a team of technicians.

At the present time, emphasis is being placed on treating patients suffering from metabolic bone disease and obesity. Through the use of specially prepared formula diets (the exact composition of which is known) measured to the milligram, it is possible to keep a "balance sheet" on each patient, and thus evaluate his progress and the effectiveness of a particular treatment. In healthy individuals there is a balance between the building-up processes in the body and the breaking-down processes, and the intake and output will be the same. If, however, an individual is eliminating more of an essential foodstuff than he is ingesting, the net effect is in the direction of breakdown and the patient is said to be in "negative balance." This "negative balance" is what occurs in untreated metabolic bone disease and in obese patients who are losing weight.

In metabolic bone disease, it is important to determine how the patient's body handles certain essential components of bone, such as calcium and phosphorus. The use of minute quantities of radio-active materials (less than in an ordinary x-ray) and special counting devices can yield invaluable information about the fate of such elements in the body.

The Unit's Laboratory, showing team of Technicians, and Medical Student (above), who is working as a pre-doctoral research fellow.

A patient who has suffered from a very rare bone disorder. Treatment has resulted in the patient's ability to leave her bed and walk with partial aid of crutches.

Radio-active materials also are used in the study of obesity to determine what happens in weight loss—is the patient losing fat, muscle or water? In addition, through the study of the mechanisms involved in weight loss and how the loss occurs with different diets, it can be determined which kind of low-calorie diet should be given each individual to achieve the most healthy weight loss. It has been determined, for example, that individuals on a low-calorie diet containing a high percentage of fat lose at least as much muscle as fat. This is not a healthy weight loss.

These are only a few of the methods of treatment and the studies being undertaken within the Metabolic Unit; and, through the use of these and other “special tools” which the Unit provides, a better understanding of metabolic bone disease and obesity has resulted.

Ultimately, the Unit will afford a means of treating and studying a variety of disease states as well as providing an invaluable tool for education at all levels—research fellows, residents, interns, medical students, and hospital nursing and dietary personnel.

Established through funds provided by the Rice Foundation, this Unit is called the Wilhelmina Rice Metabolic Unit in memory of Mr. Daniel F. Rice's mother. It is anticipated that the work of this “hospital within a hospital” will play a vital role in attaining the Hospital's goals of improved patient care, teaching and research.

MEDICAL STAFF

ACTIVITIES

Dr. James W. Merricks will present a paper in early October before the Chicago meeting of the North Central Section, American Urological Association. His subject: "Postoperative Urinary Retention in a General Hospital."

As a Member of the Cancer Control Committee of the National Cancer Institute, *Dr. Danely P. Slaughter* will be in Washington, D.C. in mid-September to attend a meeting of this Committee.

Drs. Paul H. Holinger and *William F. Hughes* will attend the October meeting of the American Academy of Ophthalmology and Otolaryngology. Dr. Holinger will present a paper on "The Role of Broncho-esophagology in Otolaryngology." Dr. Hughes will be a participant in the scientific exhibit on "Corneal Dystrophies."

In mid-September, Dr. Holinger will be Guest Speaker before the North and South Carolina Eye, Ear, Nose & Throat Society in Charleston.

Dr. R. Kennedy Gilchrist will be in Philadelphia late in September to talk on "Studies on the Effect of Electromagnetic Fields on Intact Animals" before the International Surgical Group.

In October, Dr. Gilchrist will talk on "Cancer of the Colon and Rectum" before the Missouri Division of the American Cancer Society in Jefferson City.

ELECTIONS AND APPOINTMENTS

OFFICERS OF THE PRESBYTERIAN-ST. LUKE'S HOSPITAL MEDICAL STAFF: Dr. George W. Stuppy, President; Dr. Willard L. Wood, Vice-President; Dr. Thomas J. Coogan, Secretary.

Dr. Albert H. Andrews, Jr., Director, Department of Inhalation Therapy, Presbyterian-St. Luke's Hospital.

Dr. R. Lincoln Kesler, Vice-President, Chicago Diabetic Association; President, Bishop Anderson Foundation in the Medical Center.

Dr. Noel G. Shaw, Vice-President, Illinois Chapter, American Academy of Pediatrics; Co-Chairman, Section on Pediatrics, Illinois Congress of Maternal and Infant Welfare.

Dr. Evan M. Barton, Chairman, Medical and Scientific Committee, Illinois Chapter, Arthritis and Rheumatism Foundation.

Dr. C. A. Vander Laan, Secretary, Englewood Hospital Staff.

Dr. Burton C. Kilbourne, re-elected Treasurer, Chicago Surgical Society.

Dr. Paul H. Holinger, Chairman, Section of Otolaryngology, American Medical Association; Vice-Chairman, Residency Review Committee for Otolaryngology; North American Chairman, Section of Otolaryngology and Broncho-esophagology, Pan American Medical Association.

Dr. Harry F. Dowling, Member, House of Delegates, American Medical Association.

Dr. John H. Olwin, re-appointed to Committee on Thrombosis and Hemorrhage, National Research Council.

Dr. Theodore B. Schwartz, Vice-President, Society of Sigma XI, Chicago Professional Colleges of University of Illinois.

Dr. Steven G. Economou, Member, Chicago Surgical Society.

Dr. E. Lee Strohl, Co-Chairman, Committee of the Library, American College of Surgeons.

Dr. William F. Hughes, Consulting Editor: "Highlights of Ophthalmology."

Dr. James W. Merricks, re-elected Secretary, Rush Medical College Alumni.

Dr. George W. Stuppy, President, University of Chicago Medical Alumni Association.

Dr. D. V. L. Brown, Consultant to U.S. Air Force Missile Development Center in conjunction with "Operation Man High" (manned high altitude flights); and Consultant to U.S. Air Force—University of Texas Radiobiology Laboratories in Austin, Texas.

Drs. S. C. Henn and *Craig D. Butler* are among staff members who will attend the Annual Meeting of the American Academy of Pediatrics at the Palmer House in October. Dr. Butler will be serving his third and last year as Chairman of the Scientific Program Committee.

Dr. Kurt Springer will attend the Seminar Congress in Otolaryngology at the University of Vienna, Austria, in September.

"Neurologic Scourge: Multiple Sclerosis" will be *Dr. Roland P. Mackay's* lecture at the Museum of Science and Industry on September 20.

In October, Dr. Mackay will be Guest Speaker at the 75th Anniversary of the Philadelphia Neurological Society.

Dr. Bernard Taffe will present a paper entitled "Surgical Face Planing" at the Edgewater Hospital Staff meeting in October.

Drs. Frank V. Theis and *Hushang Javid* will be in Munich, Germany, in mid-September to attend the International Congress of the International Cardio-Vascular Society. Dr. Javid will present a paper on "Occlusive Disease of Aortic Arch Branches."

While in Munich, Dr. Theis also will attend the XVIII Congress of the International Society of Surgery. Prior to going to Munich, he will visit, by special invitation, the Surgical Department of the University of Vienna, Austria, where a program has been arranged for North American members of the International Surgical Society.

Dr. George P. Guibor will give an instruction course on Orthoptics at the American Academy of Ophthalmology meeting in Chicago in October.

On September 29, *Dr. Edward L. Jenkinson* will receive the Centennial Distinguished Service Award for loyal and devoted service to Northwestern University Medical School. These awards will be conferred upon Emeritus Professors of the School who have served as Chairmen of their departments.

Early in October, *Dr. John S. Graettinger* will lecture at the 14th Annual Postgraduate Course of the American College of Chest Physicians. His subject: "Function of the Right Ventricle and Its Measurement."

Dr. Thomas J. Coogan will attend the American Heart Association meeting in Philadelphia in October.

In late July, *Dr. A. Beaumont Johnson, III* moderated a panel discussion, "Cerebral Aneurysms," at Xavier Hospital in Dubuque, Iowa.

Dr. Harry E. Dowling will be in Geneva, Switzerland, in mid-September for the International Symposium on Chemotherapy. He will present a paper entitled "Clinical Contribution to the Problem of Antibiotic Combinations," and will serve as Chairman of a Panel on Sulfonamides.

While abroad, *Dr. Dowling* will visit universities and give talks to medical societies in Italy, Austria, Germany, Sweden, Denmark, Holland, Belgium and England.

"Ablative Procedures in Carcinoma of the Breast" will be the subject of *Dr. Samuel G. Taylor, III's* paper to be presented at the Cancer Chemotherapy Conference in Vergennes, Vermont, in late September.

Dr. Louis W. Schultz will be in New York City in mid-September where he will present a paper, "A Preliminary Report on a New Treatment for Ameloblastomas," before the Centennial Session, American Dental Association.

Dr. Steven G. Economou recently delivered a paper before the Society of Vascular Surgery in Atlantic City. His subject: "Persistent Experimental Aortic Aneurysms in Dogs" (Co-authored by Drs. C. Bruce Taylor, Edward J. Beattie, Jr., Carl Davis, Jr.).

In July, *Dr. Robert S. Kassriel* was in Paris, France, to attend the International Congress of School and University Health.

Many Members of the Medical Staff will be in Atlantic City from September 28 to October 2 to attend the 45th Annual Clinical Congress of the American College of Surgeons. They include: Drs. James W. Merricks, John T. Reynolds, E. Lee Strohl, John H. Schneewind, Frederic A. dePeyster, Danely P. Slaughter, Paul H. Holinger, William J. Grove, R. Kennedy Gilchrist, and Richard H. Andresen.

Dr. Andresen will present a paper entitled "Tissue Reactions of Trophoblastic and Embryonic Transplants in the Pregnant Host" (Co-authored by G. M. Hass, M.D., D. A. Madden, B.S., S. Pappas).

Dr. Gilchrist will present a talk on "Cholecystography and Cholangiography," and will moderate a TV panel on "Ideal Ureterostomy."

Dr. Grove will preside over the Forum Session pertaining to tumors.

A panel discussion on "Cancer of the Larynx" will be conducted by *Dr. Holinger*.

Dr. Slaughter will attend the meeting of the Cancer Committee of the College at this time. He is Chairman of this Committee.

Dr. dePeyster has submitted a paper for presentation entitled "Increased Antitumor of Nitrogen Mustard Caused by Induced Hypothyroidism" (with L. A. Humphrey, M.D., E. T. Hoppe).

Dr. Schneewind will narrate two color motion picture films: "Repair of the Injured Tendon and Nerve" and "Free Tendon Graft to Dorsum of Hand."

A paper entitled "Tumors of the Small Bowel" will be presented by *Dr. Strohl*.

Dr. Reynolds will participate on a Panel, "Pitfalls in Surgery of Biliary Tract," and also will appear on the program discussing "Surgical Treatment of Malignant Tumors of Liver."

Dr. Merricks will show his motion picture "Vaginal Repair of Urethrovaginal Fistula," and will be presented with a Citation for this film during this Clinical Congress of the American College of Surgeons.

Dr. Paul W. Greeley was in London, England, in July to attend the quadrennial meeting of the International Society of Plastic Surgeons held at the Royal College of Surgeons. *Dr. Greeley* presented a movie before the Society entitled "A New Supplementary Procedure for the Treatment of Facial Paralysis" (Joint-author, *Dr. John W. Curtin*).

In Philadelphia in late October, *Dr. Benjamin M. Gasul* will participate in a Fireside Conference, American College of Cardiology. The subject: "Office Diagnosis of Congenital Heart Disease."

Dr. Gasul was in Hawaii recently to address members of the Honolulu Chapter of the American College of Chest Physicians in conjunction with the Pediatric Attending Staff of Children's Hospital in Honolulu. While in Hawaii, he went to Hilo to speak before the Hawaii County Medical Society on "Pediatric Cardiology."

Dr. Arthur H. Klawans will participate on the Faculty of the Chicago Medical Society's Postgraduate Course in Obstetrics and Gynecology to be held in October. His subject: "Bleeding in Early Pregnancy."

Dr. Evan M. Barton will attend the Midwest Regional Meeting of the American College of Physicians in Indianapolis in late September.

During the month of September, *Dr. John R. Wolff* will attend meetings of the Central Association of Obstetricians and Gynecologists in Chicago; the American College of Obstetricians and Gynecologists in Omaha; and the Mississippi Valley Medical Society in St. Louis.

Dr. Howard Wakefield will be in Tulsa, Oklahoma, in mid-September to attend the Regional Meeting of the American College of Physicians. He will present a paper entitled "Experimental Distention of the Human Gall Bladder—Effect on Electrocardiogram and Clinical Implications," and also will give the After-Dinner Address. His subject: "Some Activities of the American College of Physicians."

Instructor and student nurse demonstrate new medication cart designed by members of Presbyterian-St. Luke's Nursing Department in cooperation with the American Hospital Supply Corporation.

The cart was designed to meet the needs of the nurse in carrying out a revised and streamlined medication procedure. Both the procedure and the cart design were the result of intensive study and research in this area.

108 NURSES GRADUATE

A combined total of 6,131 nurses will have been graduated from the Presbyterian Hospital and the St. Luke's Hospital Schools of Nursing when the 108 seniors of the now merged schools receive their diplomas and pins on September 11 at Graduation Exercises in Orchestra Hall. Bishop Gerald Francis Burrill will deliver the Commencement address, and Mr. John P. Bent, President, Board of Trustees, will present diplomas to the class. Dr. Clarence Wright will give the invocation and the benediction.

With the graduation of this class of 1959, the Presbyterian School (founded in 1903) and the St. Luke's School (established in 1884) will be officially succeeded by the Presbyterian-St. Luke's School and program first offered to freshmen registering in September, 1957. Total enrollment in this school and program as of September, 1959, will include 170 Nurse Interns, 155 juniors, and 140 freshmen, scheduled to enroll on September 16.

The Accrediting Agency of the National League for Nursing will evaluate the new "Two Year plus Internship" curriculum in October. The

League also is conducting a nation-wide study of the Cost of Nursing Education, and the Presbyterian-St. Luke's School has been selected as one of the participating institutions. This School, with its current enrollment of 465 students, is one of the largest hospital schools of nursing in the United States.

COMBINED BOARD ELECTS OFFICERS

At the first joint meeting of the combined Woman's Boards on June 22, the following were elected officers of the Presbyterian-St. Luke's Woman's Board:

- MRS. FENTRESS OTT, President
- MRS. ANTHONY L. MICHEL, Assistant to the President; Head of the Finance Committee
- MRS. WILLIAM S. COVINGTON, Assistant to the President; Coordinator
- MRS. GEORGE S. CHAPPELL, JR., First Vice President
- MRS. E. HALL TAYLOR, Vice President
- MRS. MARSHALL FIELD, JR., Vice President
- MRS. PAUL W. OLIVER, Vice President
- MRS. STANLEY WHITFORD, Vice President
- MRS. HOWARD TEICHEN, Recording Secretary
- MRS. ROBERT T. ISHAM, Assistant Recording Secretary
- MRS. ALLYN D. WARREN, Corresponding Secretary
- MRS. HERBERT P. McLAUGHLIN, Assistant Corresponding Secretary
- MRS. JOHN F. VICKERY, Treasurer
- MRS. JOHN V. FARWELL, Assistant Treasurer for Fashion Show
- MRS. F. RICHARD MEYER, III, Assistant Treasurer for Fund Raising Committees

They will take office at the Annual Meeting to be held on September 14.

NEW APPOINTMENTS ANNOUNCED

James J. Herman and Calvin C. Singer have been appointed Assistant Directors of Presbyterian-St. Luke's Hospital.

Mr. Herman had served as an Assistant Administrator at St. Luke's and was Acting Administrator from April 1 until the physical merger.

Mr. Singer served as an Assistant Administrator at St. Luke's and his responsibilities included the planning and execution of the physical merger of the two out-patient departments.

NEW PARKING LOT OPEN

In an effort to improve the hospital's parking facilities, Presbyterian-St. Luke's Hospital has opened a new parking lot for visitors only.

Located on the southeast corner of Paulina and Harrison Streets, the lot is open twenty-four hours a day and accommodates 168 cars.

ADMINISTRATIVE RESIDENT APPOINTED

It has been customary in the past for both Presbyterian and St. Luke's to cooperate with university schools of hospital administration in their Administrative Residency Programs.

Clarence C. Traum is the first student to receive an Administrative Residency appointment to Presbyterian-St. Luke's.

Mr. Traum came to the hospital in July and will complete his Residency in one year. He is studying at the University of Chicago for his Masters in Business Administration with a Major in Hospital Administration.

Throughout the year he will be assigned special projects by the hospital administration and also will rotate through various hospital departments.

NEW SCHOOL OPENED

The School of Medical Technology, in operation informally for many years in the laboratory at St. Luke's Hospital and on a formal basis since 1953, has been transferred to Presbyterian-St. Luke's Hospital.

Under the direction of Dr. Frederick C. Bauer, Attending Pathologist, the School has a well organized program of laboratory and lecture facilities. Practical instruction is given in Blood Bank, Hematology, Chemistry, Serology, Urinalysis, Bacteriology, Histologic Technic and other subjects by qualified personnel in each of these departments.

The School graduated five students in July of this year. They had successfully completed at least two years of required college studies and the hospital Medical Technology internship. In the new School, the course of instruction is given during a training period of eighteen months.

LESTER B. KNIGHT TRAVELING FELLOWSHIP

For some years the Department of Surgery has been anxious to inaugurate an exchange fellowship program with a foreign teaching hospital. Through the generosity of Lester B. Knight, President of Lester B. Knight & Associates, Inc., such a program is now a reality and as of July 1, 1959, the first exchange took place between Dr. David Rendleman, a third year resident at Presbyterian-St. Luke's, and Dr. E. J. Williams, a third year resident at the London Hospital in London, England. This hospital is affiliated with the University of London.

Mr. Knight's gift of \$5,000 will provide the funds for normal stipends, room, board, travel and extra allowances for these two doctors to enjoy a stimulating year. The fellowship is known as the Lester B. Knight Traveling Fellowship.
